

school preparation, interest in SEMT, choice of college major, barriers, use of disability support service, critical incidents, and education and career goals. To address the research objectives, the proposed project involves an in-depth study of a sample (n=20) of different types of postsecondary educational institutions (research universities, 4-year colleges,

disability-friendly universities, and community colleges). At each institution, three groups of students will be surveyed: students with disabilities majoring in SEMT, students with disabilities majoring in other fields, and students without disabilities majoring in SEMT. Interviews with SEMT faculty at each institution will also be conducted. This approach will allow for exploration

of the ways in which students with disabilities majoring in SEMT are similar to and different from other groups of students, as well as the views of faulty toward students with disabilities. The project is planned as a one-time data collection what will occur in the spring of 1996. Burden estimates are as follows:

Respondents	Number of interviews	Estimated time in minutes	Total burden (hours)
SEMT students with disabilities	725	30	363
Non-SEMT students with disabilities	375	25	156
SEMT students without disabilities	375	25	156
SEMT faculty members	200	15	50

Send Comments to Herman Fleming, Clearance Officer, National Science Foundation, 4201 Wilson Boulevard, Suite 485, Arlington, VA 22230. Written comments should be received by January 15, 1996.

Dated: November 9, 1995.

Herman G. Fleming,

NSF Clearance Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-220]

Niagara Mohawk Power Corporation; Notice of Withdrawal of Application for Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has granted the request of Niagara Mohawk Power Corporation (the licensee) to withdraw its September 1, 1994, application for proposed amendment to Facility Operating License No. DPR-63 for the Nine Mile Point Nuclear Station Unit No. 1, located in Oswego County, New York.

The proposed amendment would have revised the pressure/temperature limits in the plant technical specifications.

The Commission had previously issued a Notice of Consideration of Issuance of Amendment published in the Federal Register on October 12, 1994, (59 FR 51620). On September 22, 1995, the staff issued a denial of the amendment request which was noticed in the Federal Register on September 29, 1995, (60 FR 50650). However, by letter dated October 27, 1995, the licensee withdrew the proposed change.

For further details with respect to this action, see the application for amendment dated September 1, 1994, the staff's denial dated September 22, 1995, and the licensee's letter dated October 27, 1995, which withdrew the application for license amendment. The above documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Dated at Rockville, Maryland, this 6th day of November 1995.

For the Nuclear Regulatory Commission.

Gordon E. Edison,

Senior Project Manager, Project Directorate I-1, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

[Docket No. 40-6659]

Federal Register Notice of Amendment To Change Reclamation Milestone Date in Source Material License SUA-551 Held by Petrotomics Company for Its Shirley Basin, Wyoming Uranium Mill

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Amendment of Source Material License SUA-551 to change a reclamation milestone date.

SUMMARY: Notice is hereby given that the U.S. Nuclear Regulatory Commission has amended Petrotomics Company's (Petrotomics') Source Material License SUA-551 for Shirley Basin Wyoming to change a reclamation milestone date. This amendment was

requested by Petrotomics by letter dated September 5, 1995, and its receipt by NRC was noticed in the Federal Register on September 27, 1995.

The license amendment modifies License Condition 50 to change the completion date for a site-reclamation milestone. The new date approved by the NRC extends completion of placement of final radon barrier on the tailings pile by one year, and ten months. Petrotomics attributes the delays to (1) NRC's re-examination of cover design for performance with current standards and practices, and (2) short construction season at the Shirley Basin site. Based on review of Petrotomics' submittal, the NRC staff concludes that the delays are attributable to factors beyond the control of Petrotomics, the proposed work is scheduled to be completed as expeditiously as practicable, and the added risk to the public health and safety is not significant.

An environmental assessment is not required since this action is categorically excluded under 10 CFR 51.22(c)(11), and an environmental report from the licensee is not required by 10 CFR 51.60(b)(2).

SUPPLEMENTARY INFORMATION:

Petrotomics' license, including an amended License Condition 50, and the NRC staff's technical evaluation of the amendment request are being made available for public inspection at the NRC's Public Document Room at 2120 L Street, NW (Lower Level), Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Mohammad W. Haque, High-Level Waste and Uranium Recovery Projects Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Telephone (301) 415-6640.
