[I.D. 110695A]**Endangered Species; Permits**

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of two applications for scientific research permits (P599 and P600).

SUMMARY: Notice is hereby given that the California Department of Water Resources in Sacramento, CA (CDWR) and California State University at Chico, CA (CSU) have applied in due form for permits to take juvenile, endangered, Sacramento River winter-run chinook salmon (*Oncorhynchus tshawytscha*) for the purpose of scientific research.

DATES: Written comments or requests for a public hearing on either of these applications must be received on or before December 15, 1995.

ADDRESSES: The applications and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Director, Southwest Region, NMFS, NOAA, 501 West Ocean Blvd., Suite

4200, Long Beach, CA 90802-4213 (310-980-4016).

Written comments or requests for a public hearing should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

SUPPLEMENTARY INFORMATION: CDWR and CSU request permits under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-227).

CDWR (P599) requests a 3-year permit to collect non-lethal fin tissue samples from juvenile chinook salmon for genetic research. The goal is to develop a technique to distinguish between California's Central Valley chinook races in a mixed-stock population, particularly winter-run, based on an analysis of the nuclear DNA material from the fin tissue samples. CDWR will obtain juvenile fish from the U.S. Fish and Wildlife Service and the California Department of Fish and Game, agencies that are authorized to capture and handle listed fish under separate authorizations. CDWR proposes to anesthetize the juvenile fish, excise a 1 mm² piece of caudal fin tissue using disinfected stainless steel scissors, allow the fish to recover from the anesthetic, and release the fish back into the watershed.

CSU (P600) requests a 3-year permit to assess the use of the non-natal rearing habitat in the Central Valley by juvenile chinook salmon, specifically the small, intermittent tributaries. This knowledge may be important to protecting listed fish populations since many of the smaller tributaries are being degraded. CSU proposes to capture listed juveniles with a nylon seine, anesthetize the fish, obtain biological information, allow the fish to recover from the anesthetic, and release the fish into the habitat from which they were captured.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on either application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in these application summaries are those of the applicants and do not necessarily reflect the views of NMFS.
