BILLING CODE 7590-01-P

[Docket Nos. 50-003 and 50-247]

**Consolidated Edison Company of New York (Indian Point Nuclear Generating Unit Nos. 1 and 2); Exemption**

I

Consolidated Edison Company of New York, Inc., (the licensee) is the holder of Facility Operating License No. DPR-26 which authorizes the operation of Indian Point Nuclear Generating Unit No. 2 and Provisional Operating License (POL) No. DPR-5 which authorizes the operation of Indian Point Nuclear Generating Unit No. 1. The operating authority of POL DPR-5 for Indian Point Nuclear Generating Unit No. 1 was revoked by Commission Order dated June 19, 1980. The operating licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the Commission now and hereafter in effect.

The facility comprises two pressurized-water reactors at the licensee's site in Westchester County, New York.

II

The Code of Federal Regulations at 10 CFR 73.55, "Requirements for physical protection of licensed activities in nuclear power reactors against radiological sabotage," paragraph (a), in part, states that "The licensee shall establish and maintain an onsite physical protection system and security organization which will have as its objective to provide high assurance that activities involving special nuclear material are not inimical to the common defense and security and do not constitute an unreasonable risk to the public health and safety."

Paragraph (1), "Access Requirements," of 10 CFR 73.55(d), specifies that "The licensee shall control all points of personnel and vehicle access into a protected area." 10 CFR 73.55(d)(5) requires that "A numbered picture badge identification system shall be used for all individuals who are authorized access to protected areas without escort." 10 CFR 73.55(d)(5) also states that an individual not employed by the licensee (i.e., contractors) may be authorized access to protected areas without escort provided

the individual "receives a picture badge upon entrance into the protected area which must be returned upon exit from the protected area \* \* \*"

The licensee proposed to implement an alternative unescorted access control system which would eliminate the need to issue and retrieve badges at the entrance into the protected area and would allow all individuals with unescorted access to keep their badge with them when departing the site.

An exemption from 10 CFR 73.55(d)(5) is required to allow contractors who have unescorted access to take their badges offsite instead of returning them when exiting the site. By letter dated August 10, 1995, the licensee requested an exemption from certain requirements of 10 CFR 73.55(d)(5) for this purpose.

III

Pursuant to 10 CFR 73.5, "Specific exemptions," the Commission may, upon application of any interested person or upon its own initiative, grant such exemptions from the requirements of the regulations in this part as it determines are authorized by law and will not endanger life or property or the common defense and security, and are otherwise in the public interest.

Pursuant to 10 CFR 73.55, the Commission may authorize a licensee to provide alternative measures for protection against radiological sabotage provided the licensee demonstrates that the alternative measures have "the same high assurance objective" and meet "the general performance requirements" of the regulation, and "the overall level of system performance provides protection against radiological sabotage equivalent" to that which would be provided by the regulation.

Currently, employee and contractor identification badges/keycards, are issued and retrieved on the occasion of each entry to and exit from the protected areas of the Indian Point Nuclear Generating Unit Nos. 1 and 2 site. Station security personnel are required to maintain control of the badges/keycards while the individuals are offsite. This practice has been in effect at Indian Point Nuclear Generating Unit Nos. 1 and 2 since the operating licenses were issued. Security personnel retain each identification badge/keycard when not in use by the authorized individual, within appropriately designed storage receptacles. An individual who meets the access authorization requirements is issued an individual picture badge/keycard which allows entry into preauthorized areas of the station. While entering the plant in the present
