DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Health Care Policy and Research

Notice of Assessment of Medical Technology

The Agency for Health Care Policy and Research (AHCPR), through the Center for Health Care Technology (CHCT) (formerly Office of Health Technology Assessment), announces that it is initiating a technology assessment or technology review of the safety, efficacy, and effectiveness of biofeedback for the treatment of hypertension.

The AHCPR is requesting information on the risks, benefits, and costs associated with the use of this mode of treatment, and the specific circumstances in which biofeedback is appropriate. The AHCPR also requests information on patient selection criteria and institutional or team criteria necessary to establish acceptable standards for appropriate benefits and risks.

The assessment consists of a synthesis of information found in published literature and obtained from appropriate sources in the private sector, Public Health Service (PHS) agencies and others in the Federal Government. AHCPR assessments and reviews are conducted in accordance with sections 904(b) and (d) of the PHS Act (42 U.S.C. 299a-2(b) and (d)), as described in the Federal Register of December 3, 1993. The evaluation is based on the most current knowledge concerning the safety, clinical effectiveness, and appropriate uses of a technology, and its relative clinical utility compared to alternative technologies. A recommendation may be formulated to assist the Office of Civilian Health and Medical Programs of the Uniformed Services (OCHAMPUS), Department of Defense, in establishing coverage policy. The information being sought by this notice is a review of past, current, and planned research related to this technology, as well as a bibliography of published, controlled clinical trials and other well-designed clinical studies.
