

although through a separate process tied to an ongoing regional assessment and environmental analysis for the Upper Columbia River Basin being conducted jointly by the BLM and Forest Service.

At this point in time, it is unclear what level of plan modification (maintenance or amendment) and NEPA analysis will be needed. Should further scoping and development of the proposed action and alternatives indicate that an EIS is not needed, NEPA analysis will be accomplished through preparation of an environmental assessment.

Resource Advisory Councils in Montana and the Dakotas will be consulted during the development of proposed standards and guidelines. This notice invites additional public comment on the issues to be addressed and alternatives to be considered in the EIS or other NEPA analysis. Issues preliminarily identified include: the effect that adoption of standards will have on resource conditions, uses, and users of public land, and the effect that adoption of guidelines will have on grazing management and livestock operations. Three preliminary alternatives have been identified: the continuation of current management as provided for in existing management plans, the adoption of the fallback standards and guidelines contained in the regulations, and the adoption of standards and guidelines developed in consultation with Resource Advisory Councils for Montana and the Dakotas.

Dated: November 24, 1995.

Randy D. Heuscher,

Acting Deputy State Director, Division of Resources.
