## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-298]

### Nebraska Public Power District (Cooper Nuclear Station); Exemption

I

Nebraska Public Power District (NPPD, the licensee) is the holder of Facility Operating License No. DPR-46, which authorizes operation of the Cooper Nuclear Station (CNS) at power levels not in excess of 2381 megawatts thermal. The facility consists of a boiling water reactor at the licensee's site in Nemaha County, Nebraska. The operating license provides, among other things, that CNS is subject to all rules, regulations, and orders of the Commission now or hereafter in effect.

II

Pursuant to 10 CFR 55.59(a)(1), each licensed operator is required to successfully complete a requalification program developed by the licensee that has been approved by the Commission. This program is to be conducted for a continuous period not to exceed 24 months in duration and upon its conclusion must be promptly followed by a successive requalification program.

In addition, pursuant to 10 CFR 55.59(a)(2), each licensed operator must also pass a comprehensive requalification written examination and an annual operating test.

III

By letter dated October 16, 1995, NPPD requested an exemption under 10 CFR 55.11 from the requirements of 10 CFR 55.59(a)(2). The scheduler exemption requested would extend the completion date for the administration of licensed operator examinations for the CNS requalification program from December 22, 1995, to March 15, 1996, because the scheduled examination time coincides with the plant refueling outage. The requested exemption would constitute a one-time extension of the requalification program duration.

In support of its request for exemption, NPPD indicated that the licensed operators at CNS will continue to participate in the ongoing requalification training program. NPPD further indicated that the assignment of
