

Proposed Project(s) in determining how effective their policymaking efforts have been over time in applying the various child support legislation to the overall child support enforcement picture. This information will help policymakers determine to what extent individuals on welfare would be removed from the welfare rolls as a result of more stringent child support enforcement efforts.

Title: April 1996 Current Population Survey Supplement on Child Support.
OMB No.: 0992-0003.
Description: Collection of these data will assist legislators and policymakers

Respondents: Individuals or Households.

Title	No. of respondents	No. of responses per respondent	Average burden per response	Burden
Supplement	47,000	1	.0241	1,136

Estimated Total Annual Burden Hours: 1,136.

Dated: November 24, 1995.
 Roberta Katson,
Acting Director, Office of Information Resource Management.

Agency Information Collection Under OMB Review

Proposed Information Collection Submitted for Public Comment and Recommendations
 In compliance with the requirements of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Administration for Children and Families (ACF) is publishing the following summary(ies). To request

copies of the proposed collection of information write to The Administration for Children and Families, OIS, DIRMS, 338F, 370 L'Enfant Promenade, SW., Washington, DC 20447, Attn: ACF Reports Clearance Officer.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information

technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Proposed Project(s)

Title: Summary Data Component (SDC) of the National Child Abuse and Neglect Data System (NCANDS)
OMB No.: 0980-0229.

Description: The Summary Data Component of the National Child Abuse and Neglect Data System is a voluntary reporting system collection aggregate data from State child protective services agencies on key indicators of reported child abuse and neglect. These data are used to inform policy and program development at the national, State and local levels.

Respondents: State, Local or Tribal Govt.

Title	No. of respondents	No. of responses per respondent	Average burden per response	Burden
SDC	56	1	30	1,680

Estimated Total Annual Burden Hours: 1,680.

Dated: November 24, 1995.

BILLING CODE 4184-01-M

Food and Drug Administration

[Docket No. 95N-0026]

Blood Systems Inc., United Blood Services; Revocation of U.S. License No. 183-009

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the revocation of the establishment license (U.S. License No. 183-009) and the

product licenses issued to Blood Systems, Inc., United Blood Services, now doing business as Blood Systems, Inc., for the manufacture of Whole Blood, Red Blood Cells, Plasma, Cryoprecipitated antihemophilic factor (AHF), Platelets, and Source Leukocytes. Blood Systems, Inc., United Blood Services has several locations; only the Lubbock, TX, location is affected by this revocation. In a letter to FDA dated June 8, 1994, the firm voluntarily requested revocation of its establishment license and product licenses at the Lubbock, TX, location and thereby waived an opportunity for a hearing.

DATES: The revocation of the establishment license (U.S. License No. 183-009) and the product licenses became effective July 19, 1994.

FOR FURTHER INFORMATION CONTACT: Sharon Carayiannis, Center for Biologics Evaluation and Research (HFM-635), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852-1448, 301-594-3074.

SUPPLEMENTARY INFORMATION: FDA has revoked the establishment license (U.S. License No. 183-009) and the product licenses issued to Blood Systems, Inc., United Blood Services, 2523 48th St., Lubbock, TX 79413, for the manufacture of Whole Blood, Red Blood Cells, Plasma, Cryoprecipitated AHF, Platelets, and Source Leukocytes. The firm's other locations are not affected by this revocation. Blood Systems, Inc., United Blood Services submitted a notice of corporate name change and is now doing business as Blood Systems, Inc.

FDA conducted an inspection of Blood Systems Inc., United Blood

Services, Lubbock, TX, from March 16 through March 25, 1994. The inspection also involved a concurrent investigation which included interviews with individuals knowledgeable about the firm's operations. The inspection and the investigation documented serious deviations from the applicable Federal regulations. Deviations identified in the inspection included, but were not limited to, the following: (1) Failure to collect blood by aseptic methods in a sterile system to protect against contamination (21 CFR 640.4(f)), in that: (a) current and former employees stated in affidavits that on numerous occasions employees broke the sterility barrier of blood containers and drained blood into vacutainer tubes or biohazard containers in order to conceal overbleeds, and (b) employees used an incorrect phlebotomy technique on numerous occasions thereby possibly contaminating the blood collection bags with room air; (2) failure to maintain records of donor adverse reaction reports (21 CFR 606.160(b)(1)(iii)), in that, on numerous occasions, employees did not document mild to moderate donor adverse reactions; (3) failure to follow standard operating procedures to adequately determine donor suitability (21 CFR 606.100(b)(1)), in that employees stated that: (a) donors were not always asked screening questions, such as high risk behavior questions, in order to expedite the donation process, (b) donors were sometimes asked if anything had changed since the last time they donated instead of being asked the required acquired immune deficiency syndrome (AIDS)-related behavior questions, and (c) individuals under the influence of alcohol were accepted as blood donors; and (4) failure to adequately and promptly notify the Director, Center for Biologics Evaluation and Research, of such errors or accidents in the manufacture of products that may affect the safety, purity or potency of any product pursuant to 21 CFR 600.14, in that, all known facts of the incidents involving a phlebotomist who used an incorrect phlebotomy technique, whereby the units may have become contaminated with room air, were not reported to the agency.

FDA determined that the deviations from Federal regulations were significant and constituted a danger to public health, warranting a suspension pursuant to 21 CFR 601.6(a). In a letter to Blood Systems, Inc., United Blood Services, dated June 6, 1994, FDA detailed the violations noted earlier in this document and suspended the firm's establishment and product licenses. In

the same letter, FDA acknowledged receipt of letters dated April 13, April 15, and May 24, 1994, submitted by the firm in response to the Form FDA-483, Inspectional Observations, left at the close of the inspection. FDA concluded that the firm's promises of corrective action were not sufficient based on the seriousness of the documented deviations. It was FDA's view that the establishment and products failed to conform to applicable donor protection standards which are intended to ensure a continuous and healthy donor population, as well as standards designed to ensure the continued safety, purity, potency, and quality of products manufactured.

FDA's letter dated June 6, 1994, also stated that the agency's inspection and investigational findings, including evidence that records were knowingly falsified, demonstrated willfulness on the part of the firm. As a result, pursuant to 21 CFR 601.5(b) the firm was not given additional time to achieve compliance with the regulations. The same letter provided notice that FDA intended to initiate proceedings to revoke U.S. License No. 183-009 and product licenses issued to Blood Systems, Inc., United Blood Services pursuant to 21 CFR 601.5(b) and provided notice of opportunity for a hearing pursuant to 21 CFR 12.21(b). In a letter to FDA dated June 8, 1994, Blood Systems, Inc., voluntarily requested that its licenses for the Lubbock, TX, location be revoked and thereby waived its opportunity for a hearing. In a letter to the firm dated July 13, 1994, FDA acknowledged voluntary revocation of the establishment license (U.S. License No. 183-009) and the aforementioned product licenses of Blood Systems, Inc., United Blood Services at the Lubbock, TX, location only. In the July 13, 1994, letter to the firm, FDA restricted the interstate distribution of autologous units currently in inventory except in documented emergency situations, and permitted the firm to resume collections of allogeneic and autologous blood products intended for distribution within the State of Texas.

FDA has placed copies of letters relevant to the license revocations on file under the docket number found in brackets in the heading of this document in the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857. These documents are available for public examination in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Accordingly, under section 351 of the Public Health Act (42 U.S.C. 262), 21 CFR 601.5, and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Director, Center for Biologics Evaluation and Research (21 CFR 5.68), the establishment license (U.S. License No. 183-009) and the product licenses issued to the Lubbock, TX, location of Blood Systems, Inc., United Blood Services for the manufacture of Whole Blood, Red Blood Cells, Plasma, Cryoprecipitated AHF, Platelets, and Source Leukocytes, were revoked, effective July 19, 1994.

This notice is issued and published under 21 CFR 601.8 and under authority delegated to the Director, Center for Biologics Evaluation and Research (21 CFR 5.67).

Dated: October 31, 1995.

Michael G. Beatrice,

Deputy Director, Center for Biologics Evaluation and Research.
