**South Carolina Electric and Gas Company and Duke Power Company; Notice of Availability of Environmental Assessment**

January 2, 1996.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) Regulations, 18 CFR Part 380 (Order No. 486, 52 F.R. 47897), the Office of Hydropower Licensing has reviewed the applications for new licenses for the following three existing hydroelectric Projects, all of which are located on the Broad River in South Carolina: (1) The Neal Shoals Project (No. 2315-002), located in Chester and Union Counties, near Carlisle, SC; (2) the Ninety-Nine Islands Project (No. 2331-002), located in Cherokee County near Gaffney, SC; and (3) the Gaston Shoals Project (No. 2332-003), located in Cherokee County, South Carolina and Cleveland County, North Carolina near Gaffney, SC. The Commission has prepared a final Multiple Project Environmental Assessment (EA) covering all three projects. The final EA contains the Commission staff's analysis of the existing and potential future environmental impacts of the projects and has concluded that licensing the projects, with appropriate environmental protective or enhancement measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

Copies of the EA are available for review in the Public Reference Room, Room 2A, of the Commission's offices at 888 First Street NE., Washington, DC 20426.

**Union Electric Company; Notice of Availability of Environmental Assessment**

January 2, 1996.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory

Commission's Regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47910), the Office of Hydropower Licensing (OHL) reviewed an application for dredging on the Lake of the Ozarks at the Osage Project. The applicant proposes to excavate approximately 1,900 cubic yards of material for a boat ramp, a boat turn-around area, and a boat access channel. The applicant also proposes to construct a small protective berm around the lakeward edge of the excavation sites. The excavation will occur on project lands and waters in Morgan County, Missouri. The primary purpose of the excavation activity is to provide boat access to project waters for private recreational use. The staff prepared an Environmental Assessment (EA) for the action. In the EA, staff concludes that approval of the non-project use of project lands would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the EA are available for review in the Public Reference Room, Room 2A, of the Commission's offices at 888 First Street NE., Washington, DC 20426.
