NUREG; Issuance, Availability

The Nuclear Regulatory Commission has recently published "Reassessment of NRC's Dollar Per Person—Rem Conversion Factor Policy," NUREG-1530. The conversion factor establishes the basis for translating radiological exposure to a monetary value and as such allows direct comparison between the potential health and safety benefits and the costs of a proposed regulatory initiative. This cost benefit tradeoff is an important consideration in NRC regulatory decisions. The new conversion factor policy discussed in this document has been incorporated in "Regulatory Analysis Guidelines of the U.S. Nuclear Regulatory Commission," NUREG/BR-0058, Revisions 2, November 1995.

Copies of NUREG-1530 may be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20402-9328. Copies are also available from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161. A copy is also available for inspection and/or copying for a fee in the NRC Public Document Room, 2120 L Street, NW. (Lower Level), Washington, DC 20555-0001.

Members of the public who wish to comment on this NUREG-series report may do so, and on the basis of these comments, the NRC holds open the possibility of revising this policy in the future.
