

conventional tug/barge combinations under 10,000 gross tons do not currently require assistance tugs. A majority of the documented Chelsea Street Bridge allisions since implementation of the existing regulations involved tug/barge combinations under 10,000 gross tons. The Coast Guard is soliciting comment regarding the possibility of applying current or future size restrictions that apply to ITBs to tug/barge combinations under 10,000 gross tons. Should the same draft and size limitations and tug assist requirements that apply to tankships of similar length and beam apply to tug/barge combinations of any tonnage? Should additional, fewer, or the same number of assist tugs be required for tug/barge combinations?
