BILLING CODE 3410-EN-P

Natural Resources Conservation Service

BS-3A Caernarvon Diversion Outfall Management Project, Plaquemines Parish, Louisiana

AGENCY: Natural Resources Conservation Service.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Natural Resources Conservation Service Guidelines (7 CFR Part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an Environmental Impact Statement is not being prepared for the Caernarvon Diversion Outfall Management Project, Plaquemines Parish, Louisiana.

FOR FURTHER INFORMATION CONTACT: Donald W. Gohmert, State Conservationist, Natural Resources Conservation Service, 3737 Government Street, Alexandria, Louisiana 71302; telephone number (318) 473-7751.

SUPPLEMENTARY INFORMATION: The environmental assessment of the federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Donald W. Gohmert, State Conservationist, has determined that the preparation and review of an Environmental Impact Statement is not needed for this project.

This project proposes to improve the utilization of fresh water, sediments, and nutrients from the Mississippi River, via the Caernarvon Diversion Structure, on approximately 23,800 acres of intermediate marsh in Plaquemines Parish, Louisiana. Project measures include the construction of variable-crested weirs, earthen plugs, flow-thru culverts, and 12,000 feet of spoil bank maintenance.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Donald W. Gohmert.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

Donald W. Gohmert,
State Conservationist.

BILLING CODE 3410-16-M

Rural Utilities Service

Barry Electric Cooperative; Finding of No Significant Impact

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact (FONSI) with respect to a request by Barry Electric Cooperative to use its general funds to construct a new headquarters facility in Barry County, Missouri. The FONSI is based on a borrower's environmental report (BER) submitted to RUS by Barry Electric Cooperative. RUS conducted an independent evaluation of the report and concurs with its scope and content. In accordance with RUS Environmental Policies and Procedures, 7 CFR Part 1794.61, RUS has adopted the BER as its environmental assessment for the project.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Wolfe, Senior Environmental Protection Specialist, Engineering and Environmental Staff, RUS, Ag. Box 1569, Washington, D.C. 20250-1569, telephone (202) 720-1784.

SUPPLEMENTARY INFORMATION: The headquarters facility is proposed to be located just north of Cassville adjacent to Highway 37 in Section 17, Township 23 North, Range 27 West. The size of the proposed site for the headquarters

facility is approximately 30 acres of which 10 acres would be developed.

The headquarters facility would consist of a 7,000 square foot office, a 35,000 square foot warehouse and 850 square foot covered storage building, and approximately 36,000 square feet of open storage area for poles, transformers, dumpsters, service and field employee vehicles, radio antenna, and salvage. The facility will also include parking for the cooperative employees and the public and a drive through depository window.

The buildings to be constructed will be pre-engineered metal. The parking and drive lanes will be a hard surface of either asphalt or concrete. The covered and open storage area will be surfaced with crushed rock and surrounded by a chain-link fence.

RUS considered the alternative of taking no action that would approve Barry Electric Cooperative's construction of the proposed headquarters facility.

Copies of the BER and FONSI are available for review at, or can be obtained from, RUS at the address provided herein or from Mr. Earle W. Shiveley, Barry Electric Cooperative, P.O. Box 307, 100 Main Street, Cassville, Missouri 65625, telephone (417) 847-2131.

Dated: January 22, 1996.
 Adam M. Golodner,
Deputy Administrator, Program Operations.
