

application amendments filed on or after that date, and will not accept for filing any additional such modification applications and amendments, but for the following limited exception which will afford existing licensees alternative means of meeting the threshold construction requirement. To be acceptable for filing, modification applications or amendments to them must meet both of the following criteria:

- Do not involve any enlargement in any portion of the proposed area of operation; and
- Do not change frequency blocks, other than to delete a frequency block(s).

5. Accordingly, it is ordered, That pending applications for new 39 GHz frequency assignments or for modification to 39 GHz licenses shall be held in abeyance and not processed until further notice, except as otherwise indicated in paragraphs 1 through 4 above. It is further ordered, That applications for modification of 39 GHz licenses or amendments to pending 39 GHz applications shall not be accepted for filing until further notice, except as indicated in paragraphs 1 through 4 above. The imposition of these changes in application processing is procedural in nature and, therefore, is not subject to the notice and comment and effective date requirements of the Administrative Procedure Act.<sup>3</sup> In any event, good cause exists for imposing immediately the processing changes without following these requirements because the changes are necessary to avoid impeding the purpose of any new rules adopted in this proceeding.

**RIN 1018-AC70**

**Export of River Otters Taken in Tennessee in the 1995-96 and Subsequent Seasons**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) regulates international trade in certain animal and plant species. Exports of animals and plants listed on Appendix II of CITES require an export permit from the country of origin. As a general rule, export permits are only issued after two conditions are met. First, the exporting country's CITES Scientific Authority must advise the permit-issuing CITES Management Authority that such exports will not be detrimental to the survival of the species. Then the Management Authority must make a determination that the animals or plants were not obtained in violation of laws for their protection. If live specimens are being exported, the Management Authority must also determine that the specimens are being shipped in a humane manner with minimal risk of injury or damage to health.

This document announces final findings by the Scientific and Management Authorities of the United States that approve the addition of Tennessee to the list of States and Indian Nations for which the export of river otters is approved. The Service intends to apply these findings to harvests in Tennessee during the 1995-96 season and subsequent seasons, subject to the same conditions applying to States previously approved.

**EFFECTIVE DATE:** January 26, 1996.
