

auction. The partitioned areas must conform to established geopolitical boundaries and each area must include all portions of the wireline service area of the rural telephone company applicant that lies within the service area.

12. The application processing rules contained in Parts 21 and 94 would be used for the 37 GHz service (as well as the 39 GHz service). Auction winners will be required to file a long form by a specific date, generally within 10 business days after the close of the auction. If the winning bidder intends to provide a common carrier service it would file FCC Form 494, and if it intends to provide a private use it would file FCC Form 402. After the Commission receives the winning bidder's down payment and the long-form application, the long-form application would be reviewed to determine if it is acceptable for filing. Upon acceptance for filing of FCC Form 494, a Public Notice announcing this fact would be released, triggering the filing window for petitions to deny. If the Commission denies all petitions to deny, and is otherwise satisfied that the applicant is qualified, a Public Notice announcing the grants will be issued. Winning bidders would have five business days after the issuance of the Public Notice to complete payment of their licenses. The Commission would then have ten business days to grant the licenses.
