

and poultry products. The safe handling instructions include a rationale statement and address the safe storage of raw product, prevention of cross contamination, cooking of raw product, and handling of leftovers.

To determine retailer compliance with this new mandatory rule, FSIS expanded the scope of the nutritional labeling study to include an estimate on the prevalence of stores that are providing safe handling instructions for raw meat and poultry items packaged at the retail level. Specifically, the rule requires that each store have the appropriate safe handling label affixed to all packages of raw meat and poultry products that it sells. NRTI found that 92.2 percent of the surveyed stores had safe handling instructions present on every package of every item. FSIS intends to follow up with retail trade associations and retailers to increase awareness that safe handling labeling at the store level is mandatory and to advise that these products are misbranded in the absence of such labeling.
