AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent to grant a case-by-case extension.

The U.S. Environmental Protection Agency is granting the request from Abbott Laboratories, Wichita, Kansas, for a case-by-case extension of the RCRA land disposal restriction (LDR) treatment standards applicable to total organic carbon (TOC), EPA Hazard Code D001. This final decision provides for a one year extension period beginning September 19, 1995, and allows Abbott to continue injecting its wastestream into their Underground Injection Control (UIC) Class I injection well until September 19, 1996. This extension is granted under the provisions found in 40 CFR 148.4. This extension will allow

the Environmental Protection Agency to complete the review of Abbott's No-Migration Petition application. The basis for approval includes the following demonstrations:

40 CFR 268.5(a)(1) Abbott Laboratories has made a good-faith effort on a nationwide basis to locate and contract for adequate alternative treatment, recovery, or disposal capacity, or establish such capacity by the effective date of the applicable restrictions.

40 CFR 268.5(a)(2) Abbott Laboratories has entered into a binding contractual commitment to provide alternative treatment, recovery, or disposal capacity.

40 CFR 268.5(a)(3) Abbott Laboratories has shown the lack of alternative capacity is beyond its control.

40 CFR 268.5(a)(4) Abbott Laboratories has shown that there will be adequate alternative treatment, recovery, or disposal capacity for all waste after the effective date established by the extension.

40 CFR 268.5(a)(5) Abbott Laboratories has provided a detailed schedule for obtaining alternative capacity including dates.

40 CFR 268.5(a)(6) Abbott Laboratories has arranged for adequate capacity to manage waste during the extension period.

40 CFR 268.5(a)(7) No surface impoundments or landfills will be used by Abbott Laboratories to manage the waste during the extension period.

This case-by-case extension is only for the waste code impacted by the September 19, 1994 Land Disposal Restrictions, Phase II and is valid for as long as the basis for granting an extension remains valid, under provisions of 40 CFR Part 124.

This proceeding is instituted pursuant to sections 8, 11, 19 and 23 of the Shipping Act of 1984 ("1984 Act"), 46 U.S.C. app. 1707, 1710, 1718 and 1721, and the Federal Maritime Commission's ("Commission") regulations governing the tariffing and bonding of non-vessel-operating common carriers, 46 C.F.R. part 514 and the licensing of ocean freight forwarders, 46 C.F.R. part 510.

Low Cost Shipping, Inc. ("Low Cost") is a company incorporated under the laws of the State of Washington. It is managed and controlled by Eugene Rogoway, General Manager of Low Cost and his wife, Marie Arnold, President of Low Cost. Low Cost also advertises using the name "International Student Services."

It appears that between June 1, 1994 and September 26, 1995, Low Cost held itself out to the public as a provider and forwarder of ocean transportation for shipments of household goods, furniture and personal effects in the foreign commerce of the United States. For at least thirteen shipments known to the Commission, Low Cost collected ocean freight from shippers. In six of these thirteen shipments, Low Cost, in the capacity of a shipper, contracted with common carriers for the ocean transportation.¹ With respect to the remaining seven shipments, Low Cost dispatched the shipments from the United States by processing the documentation and booking the cargo.²
