

Classification

The Assistant Administrator for Fisheries, NOAA has initially determined that this action is consistent with the FMP and the national standards and other provisions of the Magnuson Act.

This proposed rule has been determined to be not significant for the purposes of E.O. 12866.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. This rule, if adopted, would not change the amount of fish caught or retained or the number of vessels participating, and would not confer a competitive advantage to any user group. As a result, a regulatory flexibility analysis was not prepared.

List of Subjects in 50 CFR Part 663

Fisheries, Fishing, Reporting and recordkeeping requirements.

Dated: February 26, 1996.

Gary Matlock,

Program Management Officer, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 663 is proposed to be amended as follows:

PART 663—PACIFIC COAST GROUND FISH FISHERY

1. The authority citation for part 663 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

2. In § 663.23, paragraphs (b)(2)(i)(A), (b)(2)(i)(B), (b)(2)(ii), (b)(2)(iv), and (b)(3)(i) are revised to read as follows:

§ 663.23 Catch restrictions.

* * * * *

(b) * * *

(2) * * *

(i) * * * (A) Sablefish taken with fixed gear in the limited entry or open access fishery in the EEZ may not be retained or landed from 12 noon August 29 through 12 noon September 1.

(B) All fixed gear used to take and retain groundfish must be out of EEZ waters from 12 noon August 29 through 12 noon September 1, except that pot gear used to take and retain groundfish may be deployed and baited in the EEZ after 12 noon on August 31.

(ii) *Regular season—Limited entry fishery.* The regular season for the limited entry nontrawl sablefish fishery begins at 12:01 on September 1. During the regular season, the limited entry

nontrawl sablefish fishery may be subject to trip limits to protect juvenile sablefish. The regular season will end when 70 percent of the limited entry nontrawl allocation has been or is projected to be taken. The end of the regular season may be announced in the Federal Register either before or during the regular season.

* * * * *

(iv) The dates and times that the regular season ends (and trip limits on sablefish of all sizes are resumed) and the mop-up season begins and ends, and the size of the trip limit for the mop-up fishery, will be announced in the Federal Register, and may be modified. Unless otherwise announced, these seasons will begin and end at 12 noon on the specified date. A vessel landing sablefish in Puget Sound that was taken under a limited entry permit with nontrawl gear during a regular season is not subject to trip limits on that trip (except the regular season trip limits to protect juvenile sablefish), provided the landing complies with Washington State regulations governing sablefish landings in Puget Sound after the regular season.

* * * * *

(3) Pacific Whiting—(i) *Season.* The regular season for Pacific whiting begins on May 15 north of 42°00' N. lat., on March 1 between 42°00' N. lat. and 40°30' N. lat., and on April 15 south of 40°30' N. lat. Before and after the regular season, trip landing or frequency limits may be imposed under paragraph (c) of this section.

BILLING CODE 3510-22-F

50 CFR Part 675

[I.D. 022396A]

Groundfish of the Gulf of Alaska; Pollock Seasonal Allowances

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of Availability of an amendment to a fishery management plan; request for comments.

SUMMARY: The North Pacific Fishery Management Council (Council) has submitted Amendment 45 to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands (FMP) for Secretarial review and is requesting comments from the public. Copies of the amendment may be obtained from the Council (See **ADDRESSES**).

DATES: Comments on Amendment 45 should be submitted on or before April 26, 1996.

ADDRESSES: Comments on Amendment 45 should be submitted to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK, 99802-1668 Attn: Lori Gravel, or delivered to the Federal Building, 709 West 9th Street, Juneau, AK. Copies of Amendment 45 and the Environmental Assessment/Regulatory Impact Review prepared for the amendment are available from the North Pacific Fishery Management Council, 605 West Fourth Ave., Anchorage, AK 99501-2252; telephone 907-271-2809.

FOR FURTHER INFORMATION CONTACT: Kent Lind, 907-586-7228.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to NMFS for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that NMFS, upon receiving a fishery management plan or amendment, immediately publish a document that the fishery management plan or amendment is available for public review and comment. NMFS will consider the public comments received during the comment period in determining whether to approve the FMP or amendment.

If approved, Amendment 45 would allow NMFS to establish seasonal allowances of pollock total allowable catch (TAC) by regulation. Included with Amendment 45 is a regulatory amendment that would combine the third and fourth quarterly allowances of pollock TAC in the Western and Central Regulatory Areas of the Gulf of Alaska. Under this proposal, the third and fourth quarterly allowances of pollock would be combined into a single seasonal allowance equal to 50 percent of the TAC available on October 1 in the Western Regulatory Area and September 1 in the Central Regulatory Area.

This action is intended to result in four types of management improvements: (1) Reduced chum salmon bycatch, which has been excessively high during the third quarter (July 1) opening; (2) reduced scheduling conflicts with summer salmon processing activities; (3) reduced operating costs for industry through a reduction in the number of seasonal openings from four to three; and (4) reduced risk of harvest overruns during extremely short openings.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: February 26, 1996.

Richard W. Surdi,

Acting Director, Office of Fisheries

Conservation and Management, National

Marine Fisheries Service.
