**Notice of Inventory Completion for Human Remains and Funerary Objects in the Possession of Everglades National Park, Homestead, FL**

**AGENCY:** National Park Service

**ACTION:** Notice

Notice is hereby given in accordance with provisions of the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003(d), of the completion of an inventory of human remains and funerary objects in the possession of the Everglades National Park, Homestead, FL.

A detailed assessment and inventory of the human remains and associated objects has been made by National Park Service professional staff in consultation with the Miccosukee Tribe of Indians of Florida.

In 1982, as part of an authorized survey, a single tooth was found at a site located on a hammock island in Shark River Slough. Archeological and ethnographic information indicates that the island was occupied by members of the Miccosukee tribe in the early 20th

Century. The tooth is believed to have been extracted and disposed of in a traditional manner by the Miccosukee man who lived at the site. The identity of the individual has not been determined.

A site located on another hammock island located in the vicinity of Broad River was also excavated during the 1982 project. Human remains were observed at the site and efforts were made to avoid disturbing them. However, during the course of the fieldwork, one tooth representing one individual was collected. No known individual was identified. The 41 objects found in association with the remain include: medicine and wine bottles, a glass pitcher, an earthenware jug, a creamware saucer, a padlock, a coral pendant, and several marine shells (Busycon and mercenaria). Museum records indicate that a carbide lamp and a brass signal lamp were also collected at the site but can not be located. Archeological and ethnographic information indicates that the Mosquito Island Site was a Miccosukee campsite during the mid-20th Century.

Based on the above mentioned information, officials of the National Park Service have determined that, pursuant to 43 CFR 10.2 (d)(1), the human remains listed above represent the physical remains of two individuals of Native American ancestry. Officials of the National Park Service have determined that the 41 objects listed above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony. Further, officials of the National Park Service have determined that, pursuant to 25 U.S.C. 3001 (2), there is a relationship of shared group identity which can be reasonably traced between the human remains and funerary object and the Miccosukee Tribe of Indians of Florida.

This notice has been sent to officials of the Miccosukee Tribe of Indians of Florida. Representatives of any other Indian tribe which believes itself to be culturally affiliated with the human remains or funerary objects should contact Richard Ring, Superintendent, Everglades National Park, 40001 State Road 9336, Homestead, FL 33034, telephone (305) 242-7710, before April 5, 1996. Repatriation of the human remains and funerary objects to the Miccosukee Tribe of Indians of Florida
