The above public lands aggregate 2,344.37 acres, more or less. The descriptions and acreage for the 29 Palms SLF and the Trona-Argus SLF will be revised by survey and approval of supplemental plats for the affected lands.

Approximately 71 percent, or 1,676.94 acres, have been classified and leased for nine existing landfills since 1963-1965. Of the nine existing sanitary landfills proposed for conveyance, the lands described for six locations (Newberry, Yermo, Victorville, Barstow, 29 Palms and Trona-Argus) include expansion areas aggregating 587.43 acres to meet future demands and new California State requirements for buffer zones. In addition, a new 40.00 acre transfer station, to be selected from the two alternatives described above, is proposed for the Newberry area. All sites are located in and serve communities of San Bernardino County. This action will consolidate the existing classifications, and classify all of the existing and additional lands as suitable for use under the RPP Act and to open the lands for conveyance for landfill purposes.

This action also constitutes a Notice of Intent by the Bureau to initiate an amendment to the California Desert Conservation Area (CDCA) Plan to change the existing Multiple-Use Class (MUC) "Limited" designations at three locations (Newberry Transfer Alternative No. 1, Newberry SLF, Yermo SLF) to "Unclassified". Public lands in the CDCA must be classified as either MUC M (moderate use) or be unclassified in order to be patented.

An environmental assessment will be prepared to analyze the proposed plan
