NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Electrical and Communications Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Electrical and Communications Systems (1196).

Date and Time: March 25, 1996, 8:30 am to 5:00 pm.

Place: Room 320, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA.

Type of Meeting: Closed.

Contact Person: Deborah Crawford, Program Director, Solid State and Microstructures, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, telephone: (703) 306-1339.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Solid State and Microstructures Research Equipment proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: March 4, 1996.

M. Rebecca Winkler,

Committee Management Officer.

Notice of Workshop

The National Science Foundation (NSF) will hold a two day workshop April 18-20, 1996. The workshop will take place at the NSF headquarters, 4201 Wilson Boulevard, Arlington, VA 22230. Sessions will be held from 6:30-9:30 p.m. on April 18th, from 8:00 a.m.-5:00 p.m. on April 19th, and from 9:00 a.m.-2:30 p.m. on April 20th.

The goal of the workshop is to provide a forum for gathering the views and input of leaders in the undergraduate education community on the impact of and future directions for the application of information technology to teaching and learning.

The workshop will not operate as an advisory committee. It will be open to the public. Participants will include approximately 30 leaders in various science, engineering, mathematics, and technology fields, administrators, representatives of the publishing industry, and members of educational societies dedicated to the examination of information technology issues.

For additional information, contact Dr. Lee L. Zia, Program Director, Division of Undergraduate Education, 4201 Wilson Boulevard, Arlington, VA 22230, (703) 306-1666.

Dated: February 27, 1996.

D.E. McBride,

Acting Division Director, Division of Undergraduate Education.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-482]

Wolf Creek Nuclear Operating Corporation; Wolf Creek Generating Station Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from certain requirements of its regulations for Facility Operating License No. NPF-42, issued to Wolf Creek Nuclear Operating Corporation (the licensee), for operation of the Wolf Creek Generating Station (WCGS) located in Coffey County, Kansas.

Environmental Assessment

Identification of Proposed Action

The proposed action would exempt Wolf Creek Nuclear Operating Corporation from the requirements of 10 CFR 70.24, which requires a monitoring system that will energize clearly audible alarms if accidental criticality occurs in each area in which special nuclear material is handled, used or stored. The proposed action would also exempt the licensee from the requirements of 10 CFR 70.24(a)(3) to maintain emergency procedures for each area in which this licensed special nuclear material is handled, used, or stored to ensure that all personnel withdraw to an area of safety upon the sounding of the alarm and to conduct drills and designate responsible individuals for such emergency procedures.

The proposed action is in accordance with the licensee's application for exemption dated September 19, 1995.

The Need for the Proposed Action

Power reactor license applicants are evaluated for the safe handling, use, and storage of special nuclear materials. The proposed exemption from criticality accident requirements is based on the original design for radiation monitoring at WCGS as discussed in the NUREG-0830, "Safety Evaluation Report Related to the Operation of Wolf Creek Generating Station, Unit No. 1." The exemption was granted with the original Part 70 license, but it expired with the issuance of the Part 50 license when the exemption was inadvertently not
