**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Employment and Training Administration requires information on the provisions of the amended Job Training Partnership Act (JTPA) section 401 regulations at 20 CFR 632.70. These provisions allow Indian and Native American JTPA grantees to seek the waiver of nonstatutory provisions of the current regulations at 20 CFR Parts 632 and 636. This general waiver request capability is already available to the Governors at 20 CFR 627.201, and to those section 401 grantees participating in the demonstration under Public Law 102-477 (Indian Employment, Training and Related Services Demonstration Act of 1992). The information to be collected is in support of any such waiver request(s) submitted by section 401 grantees pursuant to 20 CFR 632.70, and is necessary to allow DOL officials to make intelligent and informed decisions on the waiver requests received. Without such supplementary information, it would be impossible for the Department to grant any waivers to existing regulations. There are no continuing information requirements associated with this collection. Such collection is only mandated when a waiver request is submitted by a grantee, and serves no purpose other than to evaluate the merits of the waiver request.

**BILLING CODE 7590-01-P**

**NRC Bulletin 96-01, Control Rod Insertion Problems Issuance of Bulletin**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of issuance.

**SUMMARY:** The Nuclear Regulatory Commission (NRC) has issued Bulletin 96-01 to alert holders of pressurized water reactor (PWR) licenses (except those licenses that have been amended to possession-only status) to several recent events in which control rods have failed to completely insert into the reactor core after receiving a scram signal, and assess the operability of control rods, particularly in high burnup fuel assemblies. It is expected that all PWR license holders will review the information for applicability to their facilities and consider actions, as appropriate, to avoid similar problems. However, action is only requested from PWR license holders of Westinghouse-designed plants. This bulletin is available in the NRC Public Document Room under accession number 9603120001. This bulletin is discussed in Commission information paper SECY-96-048 which is also available in the NRC Public Document Room.

**DATES:** The bulletin was issued on March 8, 1996.

**ADDRESSES:** Not applicable.

**FOR FURTHER INFORMATION CONTACT:** Laurence I. Kopp, (301) 415-2879 (or Internet:lik@nrc.gov).

**SUPPLEMENTARY INFORMATION:** Several recent events in domestic reactors, as well as similar events in foreign reactors, have raised concerns about the operability of control rods in high burnup fuel assemblies, and may be precursors of more significant control rod binding problems in which required shutdown margins and rod drop times may be violated. Therefore, the NRC issued this bulletin to request that licensees promptly inform operators of recent events in which control rods did not fully insert and subsequently provide necessary training in required emergency response procedures. The bulletin also requests licensees to promptly determine the continued

operability of control rods based on current information, to measure and evaluate control rod performance characteristics at each outage of sufficient duration during 1996, and assess the operability and performance trend of the rods, in particular those which do not fully insert promptly, for each reactor trip during 1996.
