

could be counted as part of the potential SAFSTOR dose savings (an unlikely situation), the SAFSTOR dose savings still available is substantially more than the 65.3 person-rem "lost" by carrying out the contested activities now. Thus, even in an unlikely worst case, the SAFSTOR option would be substantially preserved. Accordingly, the staff concludes that the contested activities will not demonstrably affect the methods and options available for decommissioning.

In sum, the NRC staff will not take action to halt relatively minor YAEC activities, many of which are closely similar to ones allowed at Shoreham and Ft. St. Vrain, where there is no evidence that these activities are consuming a significant portion of the remaining radioactive dose at Yankee Rowe. In the staff's judgment, the prohibition against dismantling major systems, such as the reactor vessel and other reactor components with substantial contamination,¹⁴ sufficiently preserves the possibility of ultimately moving to the SAFSTOR option, should that be the result of the still-pending challenge to YAEC's decommissioning plan.

IV. Conclusion

For the reasons given above, Petitioner's request to prohibit six activities is denied. Those activities, plus an additional five activities identified by the Licensee as planned or ongoing, are permissible prior to approval of a decommissioning plan under the pre-1993 interpretation of the Commission's decommissioning regulations.

As provided by 10 CFR 2.206(c), a copy of this Decision will be filed with the Secretary of the Commission for the Commission's review. The Decision will

become the final action of the Commission 25 days after issuance, unless the Commission on its own motion institutes review of the Decision within that time.

Dated at Rockville, Maryland, this 18th day of March 1996.

 William T. Russell,
 Director, Office of Nuclear Reactor Regulation.
