

animal model studies, as well as in clinical and therapeutic situations, and in the formation of monoclonal antibodies.

Roles of NIEHS

1. Provide design and specifications of synthesizing the opioid dipeptide and assist in beta testing both the labeled and unlabeled ligands, and monoclonal antibodies.

2. Work cooperatively with the company(s) to determine the market potential for these opioidmimetic peptides.

Roles of the CRADA Partner

1. Provide expertise in application and commercial-oriented production of large quantities of opioid peptides.

2. Provide knowledge on the formation, purification, and stabilization of radioactive substances.

3. Provide the expertise for the production of high affinity, high specific monoclonal antibodies.

4. Develop a plan for the production, testing and commercialization of the dipeptide, radiolabeled compounds and monoclonal antibodies.

Selection criteria for choosing the CRADA partner(s) will include, but will not be limited to the following:

1. Experience in peptide synthesis.
2. Capability to produce stable radiolabeled peptides with high specific activity.

3. Ability to develop, implement and manage the product commercialization so as to ensure the dissemination of the substances of research or health care services.

4. Capacity to test labeled peptides and monoclonal antibodies.
