NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 35, "Medical Use of Byproduct Material."

2. Current OMB Approval Number 3150-0010.

3. How often the collection is required: Required reports are collected and evaluated on a continuing basis as needed due to a change in programs or as events occur.

4. Who is required or asked to report: Physicians and medical institutions who are applicants for, or holders of, an NRC license authorizing the administration of byproduct material or its radiation to humans for medical use.

5. The number of annual respondents: 1,982 NRC licensees and 4,955 Agreement State licensees.

6. The number of hours needed annually to complete the requirement or request: 376,407 hours for NRC licensees and 942,820 hours for Agreement State licensees.

7. Abstract: 10 CFR Part 35, "Medical Use of Byproduct Material," contains requirements that apply to NRC licensees who are authorized to administer byproduct material or its radiation to humans for medical use. The information in the required reports and records is used by the NRC to ensure that the health and safety of the public is protected, and that the licensee possession and use of byproduct material is in compliance with license and regulatory requirements. The revision is a net increase adjustment in burden resulting from an increase in the number of affected licensees, a reevaluation of the time required to perform individual activities and the number of times those activities are performed, and an addition of burden associated with three sections, two of which are a result of rulemaking, and one which was inadvertently omitted during the last evaluation of burden.
