POSTAL SERVICE

39 CFR Part 20

Expansion of Global Priority Mail

AGENCY: Postal Service.
ACTION: Interim rule with request for comments.

SUMMARY: The Postal Service is expanding Global Priority Mail service by increasing the number of acceptance points, countries (annotated in bold in the text) and adding weight variable rates for items up to four pounds.

DATES: The interim regulations take effect March 25, 1996. Comments must be received on or before May 28, 1996.

ADDRESSES: Written comments should be mailed or delivered to the Manager, Commercial Products, International Business Unit, US Postal Service, Room 370-IBU, 475 L'Enfant Plaza SW, Washington, DC 20260-4261. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, at the above address.

FOR FURTHER INFORMATION CONTACT: Jay Thabet, (202) 268-2269.

SUPPLEMENTARY INFORMATION: On March 17, 1995, the Postal Service published in the Federal Register (60 FR 14370) interim regulations implementing WORLDPOST Priority Letter and requested comments. A final rule adopting the interim rules as final was filed at the Office of the Federal Register March 25, 1996. In the final rule the name of the service was changed to Global Priority Mail service and additional acceptance points were added.

Global Priority Mail is an expedited airmail service providing fast reliable, and economical delivery of all items mailable as letters. Although a Global Priority Mail item will travel in the normal airmail stream between the United States and the destination country, the item will receive priority

handling in the United States and, typically, in the destination country. In the United States, after the item is deposited, the Postal Service will transport it in a dedicated stream to the appropriate gateway for dispatch. Upon arrival in the destination country, the item will also receive priority handling. Service is available only in certain ZIP Code areas in the United States and only to certain countries.

The Postal Service is now expanding the number of acceptance points to make the service more widely available. The new acceptance points are set forth below. The Postal Service is also adding weight variable rates. With the new rates, customers may use their own packaging for items weighing up to 4 pounds. Each variable weight item must bear a Global Priority Mail sticker provided by the Postal Service. These changes will make Global Priority Mail available to more customers and should make the service more useful, by making it easier to mail items other than documents or letters.

Although 39 U.S.C. 407 does not require advance notice and opportunity for submission of comments, and the Postal Service is exempted by 39 U.S.C. 410 (a) from the advance notice requirements of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C 553), the Postal Service invites interested persons to submit written data, views, or comments concerning the interim rule.

The Postal Service adopts the following interim amendments to the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

Standards of Performance for New Stationary Sources: Industrial-Commercial-Institutional Steam Generating Units; Louisiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final revision of rule.

SUMMARY: New source performance standards (NSPS) limiting emissions of nitrogen oxides (NO_x) from industrial-commercial-institutional steam generating units capable of combusting more than 100 million Btu per hour were proposed on June 19, 1984 and were promulgated on November 25, 1986. These standards limit NO_x emissions from the combustion of fossil fuels, as well as the combustion of fossil fuels with other fuels or wastes. The standards include provisions for facility-specific NO_x standards for steam generating units which simultaneously combust fossil fuel and chemical byproduct waste(s) under certain conditions. This document approves a facility-specific NO_x
