

Summary of 2nd NPRM

1. *2nd NPRM* addresses several issues relating to use of the 46.7–46.9 GHz, 59–64 GHz, and 76–77 GHz bands. First, we are proposing to amend Part 97 of our rules to restrict temporarily amateur use of the 76–77 GHz band in order to ensure that vehicle radar systems will not receive interference from amateur operations. To balance any perceived harm by amateur operators, we are proposing to upgrade the status of amateur operators in the 77.5–78 GHz band to co-primary with the radiolocation service. We are also proposing limits for emissions in the 200–231 GHz band to protect radio astronomy operations from potential interference. In addition, we are proposing to initiate the development of a spectrum etiquette standard to prevent interference among unlicensed 59–64 GHz devices, analogous to the standards used for unlicensed PCS under Part 15 of our rules, and request specific proposals for such standards. See 47 CFR 15.321 and 15.323.

2. The Initial Regulatory Flexibility Analysis ("IRFA") is contained in the text of the 2nd NPRM. The Commission requests written public comment on the foregoing IRFA. Comments must have a separate and distinct heading designating them as responses to the IRFA and must be filed by the deadlines specified in the summary above.
