Citizens Advisory Committee on Public Health Service Activities and Research at Department of Energy (DOE) Sites: Savannah River Site Health Effects Subcommittee and Savannah River Site Environmental Dose Reconstruction Project—Phase II Public Workshop: Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Agency for Toxic Substances and Disease Registry (ATSDR) and the Centers for Disease Control and Prevention (CDC), announce the following meetings.

Name: Citizens Advisory Committee on Public Health Service Activities and Research at DOE Sites: Savannah River Site Health Effects Subcommittee (SRS).

Times and Dates: 9 a.m.–5 p.m., April 15, 1996; 9 a.m.–12 noon, April 16, 1996.

Place: Holiday Inn Oceanfront, One South Forest Beach Drive, Hilton Head Island, South Carolina 29928, telephone 803/842-4402, fax 803/842-3323.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Background: Under a Memorandum of Understanding (MOU) signed in December 1990 with DOE, the Department of Health and Human Services (HHS) has been given the responsibility and resources for conducting analytic epidemiologic investigations of residents of communities in the vicinity of DOE facilities, workers at DOE facilities, and other person potentially exposed to radiation or to potential hazards from non-nuclear energy production use. HHS delegated program responsibility to CDC.

In addition, an MOU was signed in October 1990 and renewed in November 1992 between ATSDR and DOE. The MOU delineates the responsibilities and procedures for ATSDR's public health activities at DOE sites required under sections 104, 105, 107, and 120 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA or "Superfund"). These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This subcommittee is charged with providing advice and recommendations to the Director, CDC, and the Administrator, ATSDR, regarding community, American Indian Tribes, and labor concerns pertaining to CDC's and ATSDR's public health activities and research at respective DOE sites. Activities shall focus on providing a forum for community, American Indian, and labor interaction and serve as a vehicle for community concern to be expressed as advice and recommendations to CDC and ATSDR.

Matters To Be Discussed: Agenda items include: presentations from the National Center for Environmental Health (NCEH), the National Institute for Occupational Safety and Health, and the Agency for Toxic Substances and Disease Registry on the progress of current studies; an update on the workgroup selection criteria process; an update from the Radiological Assessments Corporation, and public involvement activities.

Agenda items are subject to change as priorities dictate.

Name: Savannah River Site Environmental Dose Reconstruction Project—Phase II: Public Workshop.

Time and Date: 7 p.m.–9 p.m., April 15, 1996.

Place: Holiday Inn Oceanfront, One South Forest Beach Drive, Hilton Head Island, South Carolina 29928, telephone 803/842-4402, fax 803/842-3323.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Purpose: The Savannah River Site (SRS) Dose Reconstruction Project supports research which evaluates past releases of radioactive materials and chemicals from the SRS to the surrounding environment. The Project has already undergone a first phase. Phase I involved searching the site to identify and retrieve important documents to be used for dose reconstruction. Phase II will use this information to calculate chemical and radiological source terms and identify possible intake pathways (eating, drinking, and inhalation) for people who have lived in the SRS area. This workshop will focus on the information being collected to support the reconstruction of SRS-related historical doses to members of the public. Individuals with information of possible value to the study are encouraged to attend.

Agenda items are subject to change as priorities dictate.

Contact Persons for More Information: Paul G. Renard or Nadine Dickerson, Radiation Studies Branch, Division of Environmental Hazards and Health Effects, NCEH, CDC, 4770 Buford Highway, NE, (F-35), Atlanta, Georgia 30341-3724, telephone 770/488-7040, FAX 770/488-7044.
