

the total average annual cost to the industry to be approximately \$57,261.

Commenters should note that the above estimates reflect an overall increase in burden from the previous ICR. This increase is due primarily to adjustments to the number of manifests per shipment, to the amount of time required to read the regulations, and to the amount of time needed to prepare the manifest and process it during its transmission between various handlers.

The Agency is specifically interested in comments concerning the accuracy of the number of manifests estimated, the amount of time required to read the regulations and prepare the manifest, and elements of the manifest system that result in additional burden but are not included in the ICR.

Commenters should also be advised that EPA plans a more fundamental modification of the manifest system during the period of this ICR renewal. The Agency is interested in reducing the data elements and copy requirements of the current form, and moving perhaps to a more automated means of tracking and reporting hazardous waste movement data. Therefore, EPA also solicits comments suggesting those elements of the manifest system that are most amenable to change, and the burden reduction or other benefits that could result from the suggested changes. EPA also requests comments on the concept of automating the manifest system, and suggestions and concerns from the public on the automated approaches which EPA should consider in developing a new approach to tracking hazardous waste shipments.

Send comments regarding the ICR and suggestions for reducing the burden to the address noted above in the section entitled **ADDRESSES**.
