

the total average annual cost to the industry to be approximately \$57,261.

Commenters should note that the above estimates reflect an overall increase in burden from the previous ICR. This increase is due primarily to adjustments to the number of manifests per shipment, to the amount of time required to read the regulations, and to the amount of time needed to prepare the manifest and process it during its transmission between various handlers.

The Agency is specifically interested in comments concerning the accuracy of the number of manifests estimated, the amount of time required to read the regulations and prepare the manifest, and elements of the manifest system that result in additional burden but are not included in the ICR.

Commenters should also be advised that EPA plans a more fundamental modification of the manifest system during the period of this ICR renewal. The Agency is interested in reducing the data elements and copy requirements of the current form, and moving perhaps to a more automated means of tracking and reporting hazardous waste movement data. Therefore, EPA also solicits comments suggesting those elements of the manifest system that are most amenable to change, and the burden reduction or other benefits that could result from the suggested changes. EPA also requests comments on the concept of automating the manifest system, and suggestions and concerns from the public on the automated approaches which EPA should consider in developing a new approach to tracking hazardous waste shipments.

Send comments regarding the ICR and suggestions for reducing the burden to the address noted above in the section entitled **ADDRESSES**.

SUPPLEMENTARY INFORMATION:

OMB Approval No.: 3060-0134.

Title: Application for Renewal of Private Radio Station License.
Form No.: 574R.

Type of Review: Revision of a currently approved collection.

Respondents: Businesses or other for-profit; small businesses or organizations; individuals or households; state or local governments; not-for-profit institutions.

Number of Responses: 84,000.

Estimated Time Per Response: .33 hours.

Total Annual Burden: 27,720 hours.

Needs and Uses: FCC rules require that radio station licensees renew their radio station authorization every five years. Data is used to update the existing database and make efficient use of the frequency spectrum. Data is also used by compliance personnel in conjunction with field engineers for enforcement and interference resolutions. The data collected is required by the Communications Act of 1934, as amended; International Treaties and FCC Rules 47 CFR Parts 1.922, 90.119, 90.135, 90.157, 95.89, 95.103 and 95.107. The Commission is revising the form to include a certification block for the National Environmental Protection Act (NEPA).

OMB Approval Number: 3060-0536.

Title: Rules and Requirements for Telecommunications Relay Services (TRS) Interstate Cost Recovery.

Form No.: FCC Form 431.

Type of Review: Revision of currently approved collection.

Respondents: Businesses or other for profit.

Number of Respondents: 5000.

Estimated Time Per Response: 3 hours per respondent and 500 hours burden is imposed on the TRS Administrator.

Total Annual Burden: 15,593.

Needs and Uses: The Americans with Disabilities Act of 1990 requires the Commission to ensure that telecommunications relay services are available, to the extent possible, to individuals with hearing and speech disabilities in the United States. To fulfill this mandate, the Commission adopted rules which require the provision of TRS services, set minimum standards for TRS providers and establish a shared-funding mechanism for recovering the costs of providing interstate TRS. See 47 CFR Sections 64.601-64.605. FCC Form 431 is used in implementing the shared-funding program for the recovery of interstate telecommunications relay services (TRS) costs. All common carriers must contribute to the TRS Fund and complete FCC 431 form. The information is used to administer the program. This collection is being revised to include the burden for the disclosure require contained in Section 64.604(G). An adjustment was also made to correct the actual number of TRS providers subject to requirements contained in Sections 64.604(c)(4)(iii)(C), 64.604(c)(4)(iii)(E) and 64.604(G). In previous submission we inadvertently identified these collections as being imposed on 5,000 respondents. However, only approximately 13 entities are actually subject to them. Therefore the total burden estimate has been reduced.

Acting Secretary.
