Proposed Projects

1. Needs Assessment for the National AIDS Education and Training Centers (AETC) Program—New—The National AIDS Education and Training Centers (AETC) Program is a network of fifteen regional centers with more than 75 local performance sites that conduct targeted multidisciplinary HIV education and training programs for health care providers. The normal process for AETCs is to conduct an assessment of the health care providers' learning needs before designing the training programs they intend to offer. How AETCs conduct their needs assessments has not been specified in the past. The AETCs have used a number of different techniques, resulting in data that are not comparable and cannot be aggregated.

The AETC program has developed a national computerized learning needs assessment tool and protocol, which has been field tested and is now available for use by all fifteen AETCs. The survey instruments will be sent to a random sample of approximately 13,500 health care providers nationally each year. Results from the surveys will be used to identify topical areas in HIV/AIDS treatment in which training is most needed. This will allow the AETCs to develop training programs responsive to the identified needs. The estimated burden is as follows:

Type of respondent	Number of respondents	Responses per respondent	Hours per response	Annual burden hours
Physicians:				
Target group*	1,393	1	.25	348
Others	783	1	.12	91

management contacts listed in Section 4 of this notice.

SAMHSA will publish a notice in the Federal Register regarding the amount of funding available for its programs when the final appropriation is enacted.
