

1996. The grant awardees will be responsible for: 1. establishing collaborative relationships among workforce development program, system and software providers; 2. integrating the O*NET Prototype into State and local employment, training and human resource development programs; and 3. implementing O*NET as the driving engine for the development of career and occupational information applications meeting business and education and training program users' needs.

B. Request for Proposals

During April 1996, DOL/ETA will request proposals to facilitate the implementation and integration of the O*NET Prototype in State employment and training systems. Small business concerns are eligible applicants. One contract will be awarded. Contract award date will be no later than June 30, 1996. The contract awardee will be responsible for: linking current O*NET research and development work to workforce development program, systems and software development; providing technical assistance as necessary to refine and enhance the current O*NET Prototype as a flexible, user-friendly platform for applications development; and developing and providing technical assistance and staff support to a user group of employment, training, and human resource development systems involved in O*NET implementation and integration.

C. Qualified Release of O*NET

During the Fall of 1996, DOL/ETA is planning a qualified release of a developmental version of the O*NET Database and Prototype, as completed at that point in time, to users, developers and vendors for purposes of evaluation, testing, building and enhancement. DOL/ETA is planning to license users, developers and vendors for participation in a program supporting continued O*NET development. Participants may choose from a menu of options likely to include: review, comment, and critique of the content and functionality of the Database and Prototype; validation of Database content; building the Database through contribution of occupational information; and/or further development and enhancement of the Prototype through application development. Participants are advised that the O*NET Database and Prototype may undergo substantial changes in design, content and format after the date of its release, and DOL/ETA makes no representations of similarity or compatibility with later versions. DOL/

ETA is in the process of determining licensing issues, participation options and fees that may be charged for participation. Further details will be made available as plans for this program develop.

Dated: April 11, 1996.
Raymond J. Uhalde,
Deputy Assistant Secretary, Employment and Training Administration.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 96-042]

NASA Advisory Council (NAC), Space Science Advisory Committee (SScAC), Sun-Earth Connection Advisory Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA Advisory Council, Space Science Advisory Committee, Sun-Earth Connection Advisory Subcommittee. **DATES:** Wednesday, May 1, 1996, 8:30 a.m. to 5:00 p.m.; Thursday, May 2, 1996, 8:30 a.m. to 5:00 p.m.; and Friday, May 3, 1996, 8:30 a.m. to 5:00 p.m.

ADDRESS: National Aeronautics and Space Administration, Program Review Center Ninth Floor, Room 9H40 (May 1), MIC Room 7H46 West (May 2-3), 300 E Street, SW, Washington, DC 20546.

FOR FURTHER INFORMATION CONTACT: George L. Withbroe, Code SA, National Aeronautics and Space Administration, Washington, DC 20546, (202) 358-2150.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the capacity of the room. The agenda for the meeting is as follows:

- Sun-Earth Connection Program Overview: Budget, Ongoing Program, Future Activities
- Program Reports for Magnetospheric Physics; Heliospheric Physics; Solar Physics; and Ionospheric-Thermospheric-Mesospheric Physics
- Strategic Planning Activities and Development of Sun-Earth-Heliosphere Roadmap
- Discussion and writing Groups.

It is imperative that the meeting be held on these dates to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

Dated: April 5, 1996.
Leslie M. Nolan,
*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

NATIONAL SCIENCE FOUNDATION

Collection of Information; Submission for OMB Review; Comments Requested by April 26, 1996

Title of Proposed Collection, "Undergraduate Faculty Enhancement Program Survey"

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, on Tuesday, April 11, 1995, Federal Register Vol. 60, No. 69 18427, the National Science Foundation (NSF) published, for public comment, a proposed generic clearance for collection of information, "Generic Clearance—NSF Surveys To Measure Customer Satisfaction." *No public comments were received.* A proposed collection to be considered under that generic clearance is being forwarded to the Office of Management and Budget for consideration. Comments on the proposed data collection plans and instruments may be directed to OMB at the following address: Office of Management and Budget, IRA, ATTN.: Jonathan Winer, New Executive Office Building, Room 3208, Washington, DC 20503.

Written comments should be received by April 26, 1996.

Abstract

This survey is to provide an accounting of the faculty development workshops run by the Undergraduate Faculty Enhancement (UFE) Projects supported by the National Science Foundation. This is an annual survey of each workshop. It includes questions about the individual involved in each workshop, the number of participants, and the nature of the individuals who benefited from the workshops. The data collection addresses questions asked internally about the UFE program by NSF program officers in their program planning and in conjunction with the development of the EHR Impact Database. It also addresses questions asked by the Congress and other interested parties. The UFE program will use these data to establish the influence on faculty of the UFE program. It will also show other sources of income and support received by the projects for faculty enhancement.

Respondents and burden hours: 120 responses at approximately one hour per response.

Dated: April 9, 1996.
Herman G. Fleming,
NSF Clearance Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-413 and 50-414]

Duke Power Company, et al.; Catawba Nuclear Station, Units 1 and 2, Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by letter dated February 13, 1996, Mr. C. Morris submitted a Petition pursuant to 10 CFR 2.206 requesting the U.S. Nuclear Regulatory Commission (NRC or the Commission) to take action with regard to the Catawba Nuclear Station (CNS), Units 1 and 2.

The Petitioner requests that the operating licenses for CNS and "some ten other licensees with uncoordinated breakers" (not specifically identified in the Petition) be suspended until the lack of circuit breaker coordination has been remedied, that enforcement conferences be held on these aforementioned cases, and that the CNS be defueled. The Petitioner also requests that the NRC take enforcement action against CNS for operating with a "known safety deficiency of which they did not inform the NRC . . ."

As bases for the requests, the Petitioner has submitted documentation that included a memorandum to William T. Russell, Director of the Office of Nuclear Reactor Regulation, dated May 6, 1994, wherein the Petitioner expressed a differing professional view (DPV) regarding the resolution of a breaker coordination issue identified during an electrical distribution system functional inspection (EDSFI) conducted at CNS during January-February 1992, and an NRC memorandum dated July 21, 1994, responding to the Petitioner's DPV. The NRC memorandum of July 21 confirmed that the CNS licensee's analysis prepared during the inspection, showed that the breaker coordination at CNS did not satisfy the CNS Final Safety Analysis Report (FSAR). The Petitioner also included a memorandum to James M. Taylor, Executive Director for Operations, dated July 28, 1994, wherein the Petitioner expressed a differing professional opinion concerning the uncoordinated breakers

at CNS, based on the Petitioner's concern that the staff was inclined to accept a licensee proposal to change the FSAR commitment rather than the circuit breakers without adequate justification or documentation to support such acceptance.

By letter dated April 2, 1996, the Director denied the Petitioner's request for immediate suspension of the CNS license and the defueling of CNS. The letter also indicated that no action is being taken on the Petitioner's request for suspension of operating licenses for "some ten other licensees with uncoordinated breakers" based on a lack of specificity and factual basis to support the concern.

The Petition is being treated pursuant to 10 CFR 2.206 of the Commission's regulations and has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by 10 CFR 2.206, appropriate action with regard to the Petitioner's request will be taken within a reasonable time.

A copy of the Petition is available for inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the York County Library, 138 East Black Street, Rock Hill, South Carolina.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland this 2nd day of April 1996.

William T. Russell,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

Privacy Act of 1974; Proposed Revisions to an Existing System of Records

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed revisions to an existing system of records.

SUMMARY: In accordance with the Privacy Act of 1974, as amended (Privacy Act), the Nuclear Regulatory Commission (NRC) is publishing an amendment to an existing system of records currently entitled NRC-32, "Licensee and Applicant Taxpayer Identification Number Records—NRC." NRC-32 was last published in the Federal Register on September 13, 1994, when six new routine uses were added to enhance NRC's ability to collect certain licensee fee debts. This amendment renames the system of records "Office of the Controller Financial Transactions and Debt

Collection Management Records—NRC" to cover expansion of NRC-32 to include information on nonlicense fee debts of individuals as well as information on individuals who receive money or payment from the NRC. As a result, the system of records notice is being revised in its entirety and will become the NRC's system of records for maintaining, tracking, and disseminating information on all payment and collection activities.

EFFECTIVE DATES: The revised system of records will become effective without further notice on May 28, 1996 unless comments received on or before that date cause a contrary decision. If changes are made based on NRC's review of comments received, NRC will publish a new final notice.

ADDRESSES: Send comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Docketing and Services Branch. Hand deliver comments to 11555 Rockville Pike, Rockville, Maryland, between 7:45 am and 4:15 pm Federal workdays. Copies of comments may be examined at the NRC Public Document Room at 2120 L Street, NW., Lower Level, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Jona L. Souder, Freedom of Information/Local Public Document Room Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-415-7170.

SUPPLEMENTARY INFORMATION: The NRC is entering into a Memorandum of Understanding with the Department of the Treasury's (Treasury) Debt Management Services (DMS) to establish the terms and conditions for debt collection operations to be provided by DMS on behalf of NRC to satisfy, in whole or in part, debts owed to the U.S. Government. The types of debt NRC is transferring to DMS for collection include both commercial and consumer debt. A review of the system of records (SOR) notice was conducted to determine if the published routine uses for NRC-32 would permit disclosures of information on nonlicense fee delinquent debts incurred by individuals, such as former employees and Freedom of Information Act (FOIA) requesters to Treasury's DMS for cross servicing. Cross servicing includes the possible use of all debt collection tools including administrative offset, tax refund offset, referral to debt collection contractors, and referral to the Department of Justice.
