

Guidelines for Preparing and Reviewing Applications for the Licensing of Non-Power Reactors: Availability

The U.S. Nuclear Regulatory Commission (NRC) has published NUREG-1537, "Guidelines for Preparing and Reviewing Applications for the Licensing of Non-Power Reactors." Part 1 of NUREG-1537 contains format and content guidance for non-power reactor applicants and licensees and Part 2 contains a standard review plan and acceptance criteria for NRC non-power reactor reviewers.

The format and content guide suggests a uniform format for presenting information in non-power reactor applications, helps ensure completeness of information provided, assists the Commission staff and others in locating information, and aids in increasing the efficiency of the review process. The format and content guide represents a format for non-power reactor applications that is acceptable to the NRC staff. Conformance with the format and content, however, is not required.

The standard review plan ensures the quality and uniformity of the staff reviews, makes information about regulatory matters concerning NPRs widely available, and improves the understanding of the staff review process by interested members of the non-power reactor community and the public.

The document covers all aspects of non-power reactor licensing. The document can be used for the construction permit and the initial operating license, license renewal, license amendment, decommissioning and license termination, and highly enriched to low-enriched uranium core conversions. There is also an appendix to the format and content guide that lists selected regulations that are applicable to non-power reactors.

NUREG-1537 is available for inspection and copying for a fee at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW, Washington, DC 20555. Copies of this document can also be purchased from the Superintendent of Documents, U.S. Government Printing Office, P.O. Box 37082, Washington, DC 20402-9828 or the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161-0002.

Dated at Rockville, Maryland, this 16th day of April, 1996.

For the Nuclear Regulatory Commission.
Seymour H. Weiss, Director
Non-Power Reactors and Decommissioning Project Directorate, Division of Reactor Program Management, Office of Nuclear Reactor Regulation.
