

proposed action and two alternatives. Under the proposed action, the Secretary of the Interior would remove both the Elwha and Glines Canyon dams, and allow natural river erosion to transport accumulated reservoir sediments to the ocean. The other alternatives are: remove both dams and dredge accumulated sediments into a slurry pipeline for transport to the ocean; and no action—continue to operate the dams without anadromous fish mitigation.

Impacts are analyzed on the following topics: fluvial processes and sediment transport, flooding, groundwater, surface water, native anadromous and resident fisheries, vegetation, wildlife, species of special concern, living marine resources, air quality and noise, cultural resources, socioeconomics, public health and safety, traffic, Indian trust resources, recreation, land use, and aesthetics.

All review comments received will become part of the public record and copies of comments, including names, addresses and telephone numbers provided by respondents, may be released for public inspection.
