DEPARTMENT OF ENERGY

Plutonium Finishing Plant Stabilization Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of Limited Reopening of Public Comment Period.

SUMMARY: The U.S. Department of Energy (DOE) is evaluating alternatives for stabilizing plutonium-bearing materials at the Plutonium Finishing Plant (PFP) Facility, located at the Hanford Site near Richland, Washington. On December 5, 1995 (60 FR 62244), the DOE announced the availability of the Plutonium Finishing Plant Stabilization Draft Environmental Impact Statement (DOE/EIS-0244-D). The Draft Environmental Impact Statement (EIS) was prepared pursuant to the National Environmental Policy Act (NEPA) of 1969 and its implementing regulations. Subsequent to issuing the Draft EIS, DOE issued a proposed policy for comment regarding the treatment and disposition of excess residues with plutonium concentrations below 50 weight-percent. Following an analysis using this draft policy, DOE has concluded that it may be cost-effective to immobilize up to 280 kg (617 lb) of the plutonium-bearing materials at the PFP Facility and transport it to Hanford Site solid waste management facilities for storage. The EIS is therefore being revised to include an evaluation of the environmental impacts of implementing this alternative. A determination that this plutonium-bearing material lacks a beneficial use has not been made and this alternative would only be selected subsequent to such a decision. The intent of this notice is to notify the public of an additional alternative that would immobilize certain plutonium-bearing materials, and to reopen the comment period for 21 days in order to solicit comments on the proposed alternative.

DATES: DOE invites written and oral comments on the immobilization alternative from all interested parties. Comments or suggestions regarding the adequacy, accuracy, and completeness of the immobilization alternative will be
