Proposed Termination of Judgment

Notice is hereby given that defendant, Southern Forest Products Association ("SFPA"), has filed with the United States District Court for the Eastern District of Louisiana a motion to terminate the Judgment in *United States v. Southern Pine Ass'n, et al.*, Civil Action No. 275, and that the Department

of Justice ("Department"), in a stipulation also filed with the Court, has tentatively consented to termination of the Judgment but has reserved the right to withdraw its consent pending receipt of public comments. The complaint in this case (filed February 21, 1940) alleged that the Southern Pine Association ("SPA") and its lumber company members had fixed prices, curtailed output, enforced an agreed policy of distribution and excluded others from engaging in trade and commerce.

On February 21, 1940, a Judgment was entered against the SPA and its members which *inter alia* created the SOUTHERN PINE INSPECTION BUREAU ("SPIB") as a separate entity to perform lumber grading and standards activities. The Judgment also enjoined the defendants from carrying out statistical activities related to prices, limiting production, and attempting to control distribution. In 1969, the Judgment was amended to allow SPIB to incorporate in Louisiana as a non-profit corporation and in 1993 the Judgment was amended to make certain technical changes in the way SPIB conducts its business. In 1970, the name of the SPA became the SFPA.

The Department has filed with the court a memorandum setting forth the reasons why the Government believes that termination of the Judgment would serve the public interest. Copies of SFPA's motion papers, the stipulation containing the Government's consent, the Government's memorandum and all further papers filed with the court in connection with this motion will be available for inspection at the Legal Procedure Unit of the Antitrust Division, Room 215 North, Liberty Place, Washington, D.C. 20530, and at the Office of the Clerk of the United States District Court for the Eastern District of Louisiana, 500 Camp Street, New Orleans, Louisiana 70130. Copies of any of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the decree to the Government. Such comments must be received by the Division within sixty (60) days and will be filed with the court by the Government. Comments should be addressed to Christopher S. Crook, Acting Chief, San Francisco Office, Antitrust Division, Department of Justice, 450 Golden Gate Avenue, Box

36046, San Francisco, California 94102 (Telephone: (415) 436-6660).

(the licensee) to withdraw its June 18, 1993, application for proposed amendment to Facility Operating License No. NPF-58 for the Perry Nuclear Power Plant, Unit No. 1, located in Lake County, Ohio.

Consideration of Amendment Request for Decommissioning the Molycorp, Inc., Facility in York, Pennsylvania, and Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of consideration of amendment request for decommissioning the Molycorp, Inc., facility in York, Pennsylvania, and opportunity for a hearing.

The U.S. Nuclear Regulatory Commission is considering issuance of a license amendment to Source Material License No. SMB-1408, issued to Molycorp, Inc. (the licensee), to authorize decommissioning of its former rare earth processing facility in York, Pennsylvania.

The licensee submitted the site decommissioning plan (SDP) to NRC for review on August 14, 1995. Radioactive contamination at the licensee's York facility consists of soils containing thorium-228 and uranium-238 with a volume of approximately 90,000 cubic feet that resulted from operations to recover rare earth metals from ore. These operations were conducted from April 1962 to August 1991.

The NRC will require the licensee to remediate the York facility to meet NRC's decommissioning criteria, and during the decommissioning activities, to maintain effluents and doses within NRC requirements and as low as reasonably achievable.

Prior to approving the decommissioning plan, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation
