(the licensee) to withdraw its June 18, 1993, application for proposed amendment to Facility Operating License No. NPF-58 for the Perry Nuclear Power Plant, Unit No. 1, located in Lake County, Ohio.

Consideration of Amendment Request for Decommissioning the Molycorp, Inc., Facility in York, Pennsylvania, and Opportunity for a Hearing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of consideration of amendment request for decommissioning the Molycorp, Inc., facility in York, Pennsylvania, and opportunity for a hearing.

The U.S. Nuclear Regulatory Commission is considering issuance of a license amendment to Source Material License No. SMB-1408, issued to Molycorp, Inc. (the licensee), to authorize decommissioning of its former rare earth processing facility in York, Pennsylvania.

The licensee submitted the site decommissioning plan (SDP) to NRC for review on August 14, 1995. Radioactive contamination at the licensee's York facility consists of soils containing thorium-228 and uranium-238 with a volume of approximately 90,000 cubic feet that resulted from operations to recover rare earth metals from ore. These operations were conducted from April 1962 to August 1991.

The NRC will require the licensee to remediate the York facility to meet NRC's decommissioning criteria, and during the decommissioning activities, to maintain effluents and doses within NRC requirements and as low as reasonably achievable.

Prior to approving the decommissioning plan, NRC will have made findings required by the Atomic Energy Act of 1954, as amended, and NRC's regulations. These findings will be documented in a Safety Evaluation
