

aromatic hydrocarbons (10–20%). There are various types of Stoddard solvent with different flash points and composition of linear alkanes, cycloalkanes, and aromatic hydrocarbons. ASTM specifies four types of mineral spirit (Stoddard solvent): Type I—Regular; Type II—High flash point; Type III—Odorless; and Type IV—Low Dry Point. Stoddard solvent type III selected for testing is a mixture with high aliphatic and low aromatic contents, little odor, and 100°F minimum flash point. In 1990, production volume was about 38 million pounds. NTP is developing protocols for toxicity and carcinogenicity studies.

Anyone having relevant information (including ongoing toxicological studies, current or future trends in production and import, use pattern, human exposure levels, environmental occurrence and toxicological data) to share with the NTP on any of these chemicals, should contact Dr. William Eastin within 60 days of the appearance of this announcement. The information provided will be considered by the NTP in designing these studies.

Title of Proposal: Evaluation of Home Ownership Counseling Initiatives.

OMB Control Number, if applicable: 2528–.

Description of the need for the information and proposed use: The information is being collected to determine the feasibility of setting a long-term mechanism for the collection of data to evaluate the efficacy of home ownership counseling. Evaluating counseling programs has been hampered by two methodological reasons: (1) Differences in program goals complicate any type of performance comparison; and (2) the counseling industry encounters very
