

It should be noted that at the time of its last approval of this collection, OMB placed conditions on the subsequent clearance of the collection. OMB directed EPA to analyze TRI reports submitted for reporting year 1995, recalculate the number of respondents and the respondent burden resulting from this collection, and determine if the alternative threshold should be changed. Additionally, if EPA determined that changes in the regulation were warranted, OMB directed EPA to initiate rulemaking to make the necessary changes. However, time constraints specified by OMB in its conditions leave insufficient time for EPA to comply with the above requirements. Accordingly, EPA proposes to request renewed OMB approval for this collection without, at this time, attempting to meet the conditions outlined by OMB. EPA will, however, proceed in a timely fashion with the analysis and related actions and decisions to satisfy OMB's conditions, in expectation of being able to respond to those conditions upon the next following request for OMB approval of this collection.

Burden Statement: The burden to respondents for complying with this ICR is estimated to total 803,669 hours per year, with an annual cost of \$43.7 million. These totals are based on an average burden of approximately 34.5 hours per response for an estimated 11,678 respondents, submitting an average of two reports of information annually. There are recordkeeping requirements associated with this collection. This estimate includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.
