SUPPLEMENTARY INFORMATION:

Title: Sandhill Crane Harvest Questionnaire.

OMB Approval Number: 1018-0023.

Abstract: The Migratory Bird Treaty Act and the Fish and Wildlife Act of 1956 designates the Department of the Interior as the key agency responsible for the wise management of migratory bird populations frequenting the United States and for setting hunting regulations that allow appropriate harvest that allow for the populations' well being. Beginning in 1960, hunting seasons have been allowed for sandhill cranes in portions, or in all, of nine midwestern states—Colorado, Montana, New Mexico, North Dakota, Oklahoma, South Dakota, Texas, Wyoming and Kansas. The information collected will be used to estimate the magnitude, geographical and temporal distribution of sandhill crane harvest and the portion it constitutes of the total population. Also, data collected will be used to determine the effects on harvests of daily bag limits to preclude over-harvests, and assist in determining if changes in hunting dates and the areas of States open to hunting are warranted.

Service Form Number(s): 3-530; 3-530A.

Frequency: Annually.

Description of Respondents: Individuals and households.

Completion Time: The reporting burden is estimated to average 5 minutes per respondent.

Annual Responses: Recent Service experience indicates that about 3,600 hunters will respond to the questionnaire each year. This is a decrease of about 4,400 respondents. The number of hunters contacted annually has decreased due to a change in sampling rates. A recent Service evaluation of sampling rates indicated that sampling rates could be reduced without compromising the utility of survey results for population management purposes.

Annual Burden Hours: 299.

Dated: May 3, 1996.

Robert G. Streeter,

Assistant Director—Refuges and Wildlife.
