

FERC and not use the scoping meetings for this purpose.

Interested groups and individuals are encouraged to attend the meetings and present oral comments on the environmental issues which they believe should be addressed in the Draft EIS. The more specific your comments, the more useful they will be. Anyone who would like to make an oral presentation at the meeting should contact the EIS Project Manager identified at the end of this notice to have his or her name placed on the list of speakers. Priority will be given to those persons representing groups. A list will be available at the public meetings to allow for non-preregistered speakers to sign up. A transcript will be made of the meetings and comments will be used to help determine the scope of the Draft EIS.

#### Becoming an Intervenor

In addition to involvement in the EIS scoping process, you may want to become an official party to the proceeding or become an "intervenor." Among other things, intervenors have the right to receive copies of case-related Commission documents and filings by other intervenors. Likewise, each intervenor must provide copies of its filings to all other parties. If you want to become an intervenor you must file a motion to intervene according to Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) (see appendix 4).

The date for filing of timely motions to intervene in this proceeding has passed. Therefore, parties now seeking to file late interventions must show good cause, as required by section 385.214(b)(3), why this time limitation should be waived. Environmental issues have been viewed as good cause for late intervention. You do not need intervenor status to have your scoping comments considered.

#### Environmental Mailing List

This notice is being sent to individuals, organizations, and government entities interested in and/or potentially affected by the proposed project. It is also being sent to all potential right-of-way grantors to solicit comments regarding environmental considerations related to the proposed project. As details of the project become established, representatives to PNGTS may also separately contact landowners, communities, and public agencies concerning project matters, including acquisition of permits and rights-of-way.

If you do not want to send comments at this time but still want to keep informed and receive copies of the Draft

and Final EIS's, please return the Information Request (appendix 5). If you do not return the Information Request, you will be taken off the mailing list.

Additional information about the proposed project is available from Mr. Mark Jensen, EIS Project Manager, at (202) 208-0828.

Lois D. Cashell,  
*Secretary.*

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-5512-3; OMB# 2060-0054; EPA# 1131.05]

### Agency Information Collection Activities Under OMB Review; Standards of Performance for New Stationary Sources Glass Manufacturing Plants

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3507(a)(1)(D)), this notice announces that the Information Collection Request (ICR) for Standards of Performance for New Stationary Sources—Glass Manufacturing Plants—NSPS Subpart CC) described below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

**DATES:** Comments must be submitted on or before July 1, 1996.

**FOR FURTHER INFORMATION OR A COPY CALL:** Sandy Farmer at EPA, (202) 260-2740, and refer to EPA ICR No. 1131.05.

#### SUPPLEMENTARY INFORMATION:

**Title:** Standards of Performance for Glass Manufacturing Plants (OMB Control No. 2060-0054; EPA ICR No. 1131.05). This is a request for extension of a currently approved collection.

**Abstract:** The Administrator has judged that PM emissions from glass manufacturing plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Owners/operators of glass manufacturing plants must notify EPA of construction, modification, startups, shut downs, date and results of initial performance test.

In order to ensure compliance with the standards promulgated to protect public health, adequate reporting and recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The Federal Register notice required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on September 29, 1995.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2212.4 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The capital costs associated with this rule result from purchasing particulate matter control devices and operation and maintenance of particulate matter

control devices. The estimated cost of a particulate matter control device is \$400,000. The estimated annual costs for operation and maintenance of pollution control equipment is \$175,000. This figure was calculated using estimates provided by a glass manufacturing industry consultant who stated that operation and maintenance of pollution control equipment costs approximately \$2.00 per ton of glass manufactured with the average container glass facility manufacturing 250 tons per day for 350 days per year.

**Respondents/Affected Entities:** 30.

**Estimated Number of Respondents:** 30.

**Frequency of Response:** 2.

**Estimated Number of Responses:** 60.

**Estimated Total Annual Hour Burden:** 2,588.9 hours.

**Estimated Total Annualized Cost Burden:** \$78,834.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1131.05 and OMB Control No. 2060-0054 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, OPPE Regulatory Information Division (2137), 401 M Street, SW, Washington, DC 20460 and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503.

Dated: May 22, 1996.
