

environmental consultations and notifications; and DOE Orders on waste management, waste minimization initiatives, and environmental protection.

9. Cumulative impacts from the proposed action and other past, present, and reasonably foreseeable actions at SRS.

10. Potential irreversible and irretrievable commitments of resources.

**Public Scoping Process:** DOE will conduct public scoping meetings to assist in defining the appropriate scope of the EIS and to identify significant environmental issues to be addressed. Because another EIS for a separate tritium-related activity at SRS is commencing simultaneously (the APT; see the notice in today's Federal Register), the public scoping meetings for the TEF will be held concurrently with the public scoping meetings for the APT EIS. DOE will begin each scoping meeting with an overview of tritium activities at SRS. Following the initial presentation, DOE will hold workshops on the APT and the TEF. These will either be separate workshops or a combined workshop depending on attendance levels. There will be two sessions at each meeting location. Copies of handouts from the meetings will be available to those unable to attend by writing Mr. Grainger at the address above, or by calling 1-800-242-8269.

Public notices of the dates, times, and locations of the scoping meetings will be announced in the local media at least 15 days before the meetings. DOE is committed to providing opportunities for the involvement of interested individuals and groups in this and other DOE planning activities.

The public, organizations, and agencies are invited to present oral and written comments concerning (1) the scope and issues of the EIS, and (2) the alternatives the EIS should analyze. Please address written comments to Mr. Grainger at the address indicated above.

Organizations and individuals wishing to participate in the public meeting can call 1-800-242-8269 between 8:30 AM and 5:00 PM. Eastern Standard Time, Monday through Friday, or submit their requests to Mr. Grainger at the address indicated above. DOE requests that anyone who wishes to speak at the scoping meeting preregister by contacting Mr. Grainger, either by phone or in writing. Preregistration should occur at least two days before the designated meeting. Persons who have not preregistered to speak may register at the meeting and will be called on to speak as time permits.

**Related Documentation:** Completed and ongoing environmental reviews and public comments and concerns may affect the scope of this EIS. Background information is listed below on past, present, and future activities at the SRS.

Final Programmatic Environmental Impact Statement for Tritium Supply and Recycling, DOE/EIS-0161, 1995. This PEIS presents a programmatic environmental analysis for selection of the CLWR option, as well as the analysis for the APT technology, both of which would require the TEF to support the lithium-6 aluminum alloy target alternative.

Final Interim Management of Nuclear Materials Environmental Impact Statement, DOE/EIS-0220, 1995. This EIS contains information on DOE waste management activities which could be affected by TEF waste streams.

Final Savannah River Site Waste Management, DOE/EIS-0217, 1995. The EIS contains information on SRS waste management activities which could be affected by TEF waste streams.

Draft Programmatic Environmental Impact Statement for Stockpile Stewardship and Management, DOE/EIS-0236, February, 1996. The cumulative analysis of this PEIS includes the impacts at the Savannah River Site from the Tritium Supply and Recycling Programmatic EIS for the construction of an accelerator, an upgraded tritium recycling facility, and an extraction facility.

Environmental Impact Statement for the Construction and Operation of an Accelerator for the Production of Tritium at the Savannah River Site (see notice in today's Federal Register).

Environmental Assessment for the Tritium Facility Modernization and Consolidation (anticipated). The environmental assessment is to include the impacts of modernizing and consolidating the existing tritium recycling facilities at the Savannah River Site.
