

Public Hearing exceeds the time available to accommodate all such requests, the speakers will be chosen on the basis of order of registration.

Oral presentations will be limited to five minutes per speaker. Persons speaking are requested, but not required, to supply twenty (20) copies of their written statements prior to their presentations to the National Bankruptcy Review Commission, Thurgood Marshall Federal Judiciary Building, One Columbus Circle, NE., Suite G-350, Washington, DC 20544. Written submissions are not subject to any limitations.

CONTACT PERSONS FOR FURTHER INFORMATION: Contact Susan Jensen-Conklin or Carmelita Pratt at the National Bankruptcy Review Commission, Thurgood Marshall Federal Judiciary Building, One Columbus Circle, NE., Suite G-350, Washington, DC 20544; Telephone Number: (202) 273-1813.

Susan Jensen-Conklin,
Deputy Counsel.

NATIONAL LABOR RELATIONS BOARD

Sunshine Act

AGENCY HOLDING THE MEETING: National Labor Relations Board.

TIME AND DATE: 2:00 p.m., Thursday, September 25, 1996.

PLACE: Board Conference Room, Eleventh Floor, 1099 Fourteenth St., N.W., Washington, D.C. 20570.

STATUS: Closed to public observation pursuant to 5 U.S.C. Section 552b(c)(2) (internal personnel rules and practices); and (9)(B) (disclosure would significantly frustrate implementation of a proposed Agency action * * *).

MATTERS TO BE CONSIDERED: Personnel.

CONTACT PERSON FOR MORE INFORMATION: John J. Toner, Executive Secretary, Washington, D.C. 20570, Telephone: (202) 273-1940.

Dated, Washington, D.C., September 26, 1996.

By direction of the Board.

John J. Toner,

Executive Secretary, National Labor Relations Board.

[FR Doc. 96-25563 Filed 10-1-96; 3:32 pm]

BILLING CODE 754-4501-M

NATIONAL SCIENCE FOUNDATION

Proposed Data Collection: Common Request; Title of Proposed Collection: National Survey of Recent College Graduates

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the National Science Foundation (NSF) will publish periodic summaries of proposed projects. To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, call the NSF Clearance Officer on (703) 306-1243.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: The National Survey of Recent College Graduates (NSRCG), formerly called the New Entrants Survey, has been conducted biennially since 1974. For the 1997 cycle, bachelor's and master's degree recipients in science and engineering from the academic years 1994-95 and 1995-96 will be surveyed. The purpose of the study is to provide national estimates describing the relationship between education and employment for new science and engineering graduates. The study is one of three components of the Scientists and Engineers Statistical Data System (SESTAT), formerly called the Scientific and Technical Personnel Data System (STPDS). In 1997, the NSRCG survey effort will also include a Follow-up panel survey of graduates that received their degrees between 1991 and 1994, inclusive. The purpose of the Follow-up panel survey is to create a historical data set on the same individuals permitting longitudinal analysis.

The National Science Foundation Act of 1950, as subsequently amended, includes a statutory charge to "* * * provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources, and to provide a source of information for policy formulation by

other agencies of the Federal Government." The National Survey of Recent College Graduates is designed to comply with these mandates by providing information on the supply and utilization of newly qualified scientists and engineers. Collected data will be used to produce estimates of the characteristics of new graduates entering the science and engineering labor force. They will also provide necessary input into the SESTAT labor force model, which produces national estimates of the size and characteristics of the country's science and engineering population. The Foundation uses this information to prepare congressionally mandated reports such as Women and Minorities in Science and Engineering and Science and Engineering Indicators. A public release file of collected data, designed to protect respondent confidentiality, will be made available to researchers on CD-ROM and on the World Wide Web.

To conduct the study, lists of 1994-95 and 1995-96 science and engineering bachelor's and master's degree recipients will be collected from a nationally representative sample of 275 institutions awarding such degrees. The United States Department of Education's Family Policy Compliance Office has reviewed the study's goals and procedures and concluded that postsecondary institutions may provide these lists without violating the Family Education Rights and Privacy Act of 1976 (FERPA). From the collected lists, a sample of approximately 13,500 graduates will be selected for the NSRCG and 14,000 graduates will be selected for the Follow-up panel survey. The sample design includes oversampling of minority graduates and varying sampling rates to represent specific fields of science and engineering. Sample members will be requested to complete a 30 minute interview conducted by telephone and/or mail. The survey will be collected in conformance with the Privacy Act of 1974. Each graduate's participation will be entirely voluntary. NSF will insure that all information collected will be kept strictly confidential and will be used only for research or statistical purposes, analyzing data, and preparing scientific reports and articles.

The graduate sample size for the NSRCG for two academic years covered by this survey cycle (1994-95 and 1995-96) is estimated to be 13,500. An unweighted graduate response rate of 85 percent is anticipated (86 percent was obtained on the previous cycle). The graduate sample size for the Follow-up panel survey is estimated to be 14,000. An unweighted graduate response rate
