NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: Application for License to Export Nuclear Material and Equipment, NRC Form 7

2. Current OMB approval number: 3150-0027

3. How often the collection is required: On occasion; for each separate request for a specific export license and for exports of incidental radioactive material using existing general licenses.

4. Who is required or asked to report: Any person in the U.S. who wishes to export: (a) nuclear material and equipment subject to the requirements of a specific license; (b) radioactive waste subject to the requirements of a specific license; and (c) incidental radioactive material that is a contaminant of shipments of more than 100 kilograms of non-waste material using existing NRC general licenses.

5. The number of annual respondents: 153

6. The number of hours needed annually to complete the requirement or request: 330 hours (2.2 hours per response)

7. Abstract: Any person in the U.S. wishing to export nuclear material and equipment requiring a specific authorization or radioactive waste requiring a specific authorization must file an application for a license on NRC Form 7. The application will be reviewed by the NRC and by the Executive Branch, and if applicable statutory, regulatory, and policy considerations are satisfied, the NRC will issue a license authorizing the export.

A completed NRC Form 7 must also be filed by any person in the U.S. wishing to use existing NRC general licenses for the export of incidental radioactive material before the export takes place (if the total amount of the shipment containing the incidental radioactive material exceeds 100 kilograms). The form is reviewed by the NRC to ensure that the NRC is informed before the fact of these kinds of shipments and to allow NRC to inform other interested parties, as appropriate, including import control authorities in interested foreign countries.

Submit, by January 3, 1996, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?
