

respect to the NRC review according to IEEE Standard 603. Revised Appendix 7.1-A addresses rule changes (10 CFR Part 52 and revisions to 10 CFR Part 50) and identifies new regulatory guides on the digital system design process. Revised Appendix 7.1-B incorporates digital I&C system topics into the review for compliance with the requirements of IEEE Standard 279 as stated in 10 CFR 50.55a(h). Revised Appendix 7-A includes the new BTPs.

The updated SRP Chapter 7 does not, by itself, establish any new or revised requirements. It incorporates lessons learned from the completed reviews of I&C systems in the advanced light water reactors and digital I&C system retrofits of operating reactors. The review guidance described in the updated SRP Chapter 7 will be used by the NRC staff in the evaluation of submittals in connection with applications for construction permits, standard design certifications and design approvals, combined operating licenses, and operating plant license amendments.

Work related to updating SRP Chapter 7 was performed in accordance with the guidance in NUREG-1447, "Standard Review Plan Update and Development Program—Implementing Procedures Document," dated May 1992.

The purpose of this notice is to solicit public comment on whether the revised text accurately and fully reflects established NRC staff review criteria, positions and existing regulations. The updated draft SRP Chapter 7 and the supporting referenced documents provide traceability back to the changes made to the SRP Chapter 7 currently in effect. The draft SRP Chapter 7 is made available to the public as part of the NRC's policy to inform the nuclear industry and the general public of regulatory procedures and policies. Comments will be considered and revisions made to the draft SRP Chapter 7 as appropriate based on the comments received. The final SRP Chapter 7 update will be issued in approximately mid-1997. SRP Chapter 7 will be revised periodically, as appropriate, to accommodate future new technologies, information, and experience. The NRC encourages comment from interested parties; however, public review is not intended to reopen a dialogue on the merits of the requirements themselves, but should be focused on the purpose stated above. The NRC also requests specific comments on whether an appropriate level of detailed guidance has been provided for the NRC staff reviewers in the proposed Chapter 7 update particularly with regard to digital I&C review criteria.
