

The Energy Information Administration, as part of its continuing effort to reduce paperwork and respondent burden (required by the Paperwork Reduction Act of 1995 (Pub. L. 104-13)), conducts a presurvey consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing reporting forms. This program helps to ensure that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly assessed.

II. Current Actions

Form EIA-902 will be submitted in 1997 for approval by the Office of Management and Budget for a period not in excess of three years pursuant to Section 3507(d) of the Paperwork Reduction Act of 1980 (Pub. L. 96-511). EIA is providing this opportunity for the public to review and comment on the draft survey form and instructions.

This survey is a new collection. Data that would be collected on Form EIA-902 include the number of geothermal heat pumps shipped by type, regional destinations by type, type of customers, and distributions by market sector.

III. Request for Comments

Prospective respondents and other interested parties should comment on the actions discussed in item II. The following guidelines are provided to assist in the preparation of responses.

General Issues

EIA is interested in receiving comments from persons regarding:

A. Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility. Practical utility is the actual usefulness of information to or for an agency, taking into account its accuracy, adequacy, reliability, timeliness, and the agency's ability to process the information it collects.

B. What enhancements can EIA make to the quality, utility, and clarity of the information to be collected?

As a Potential Respondent

A. Are the instructions and definitions clear and sufficient? If not, which instructions require clarification?

B. Can data be submitted in accordance with the due date specified in the instructions?

C. Public reporting burden for this collection is estimated to average two hours per response. Burden includes the total time, effort, or financial resources expended to generate, maintain, retain, or disclose or provide the information including: (1) Reviewing instructions; (2) developing, acquiring, installing, and utilizing technology and systems for the purposes of collecting, validating, verifying, processing, maintaining, disclosing and providing information; (3) adjusting existing ways to comply with any previously applicable instructions and requirements; (4) training personnel to respond to a collection of information; (5) searching data sources; (6) completing and reviewing the collection of information; and (7) transmitting, or otherwise disclosing the information.

Please comment on (1) the accuracy of our estimate and (2) how the agency could minimize the burden of the collection of information, including the use of automated collection techniques or other forms of information technology.

D. EIA estimates that respondents to this survey will not incur any reporting costs other than the reporting burden cited above. What is the estimated (1) total dollar amount annualized for capital and start-up costs and (2) recurring annual dollar amount of operation and maintenance and purchase of services costs associated with this data collection? The estimates should take into account the costs associated with generating, maintaining, and disclosing or providing the information.

E. Do you know of any other Federal, State, or local agency that collects similar data? If you do, specify the agency, the data element(s), and the methods of collection.

As a Potential User

A. Can you use data at the levels of detail indicated on the form?

B. For what purpose would you use the data? Be specific.

C. Are there alternate sources of data and do you use them? If so, what are their deficiencies and/or strengths?

D. For the most part, information is published by EIA in U.S. customary units, e.g., cubic feet of natural gas, short tons of coal, and barrels of oil. Would you prefer to see EIA publish more information in metric units, e.g., cubic meters, metric tons, and kilograms? If yes, please specify what information (e.g., coal production, natural gas consumption, and crude oil imports), the metric unit(s) of measurement preferred, and in which

EIA publication(s) you would like to see such information.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.

Statutory Authority: Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995 (Pub. L. 104-13).

Issued in Washington, D.C. December 24, 1996.

Yvonne Bishop,

Director, Office of Statistical Standards,
Energy Information Administration.

Office of Energy Research

Energy Research Financial Assistance Program Notice 97-05 Energy Biosciences

AGENCY: Department of Energy (DOE).

ACTION: Notice inviting grant preapplications

SUMMARY: The Office of Basic Energy Sciences of the Office of Energy Research (ER), U.S. Department of Energy (DOE) invites preapplications from potential applicants for research funding in the Energy Biosciences program area. The intent in asking for a preapplication is to save the time and effort of applicants in preparing and submitting a formal project application that may be inappropriate for the program. The preapplication should consist of a two- to three-page concept paper on the research contemplated for an application to the Energy Biosciences program. The concept paper should focus on the scientific objectives and significance of the planned research, and include an outline of the approaches planned, and any other information relating to the planned research. No budget information or biographical data need be included; nor is an institutional endorsement necessary. The preapplication gives us the opportunity to advise potential applicants on the suitability of their research ideas to the mission of the DOE Energy Biosciences program. A response indicating the appropriateness of submitting a formal application will be sent from the Division of Energy Biosciences office in time to allow for an adequate preparation period for a formal application.

DATES: For timely consideration, all preapplications should be received by February 28, 1997. However, earlier

submissions will be gladly accepted. A response to timely preapplications will be communicated by April 18, 1997. The deadline for receipt of formal applications is June 18, 1997.

ADDRESSES: Preapplications referencing Program Notice 97-05 should be forwarded to: U.S. Department of Energy, Office of Basic Energy Sciences, ER-17, Division of Energy Biosciences, 19901 Germantown Road, Germantown, MD 20874-1290, Attn: Program Notice 97-05. Fax submissions are acceptable, Fax Number (301) 903-1003.

FOR FURTHER INFORMATION CONTACT: Ms. Pat Snyder, Division of Energy Biosciences, Office of Basic Energy Sciences, ER-17, 19901 Germantown Road, Germantown, MD 20874-1290, telephone (301) 903-2873; E-mail pat.snyder@oer.doe.gov.

SUPPLEMENTARY INFORMATION: Before preparing a formal application, potential applicants should submit a brief preapplication, which consists of two to three pages of narrative describing research objectives. These will be reviewed relative to the scope and the research needs of the Energy Biosciences program. The Energy Biosciences program has the mission of generating *fundamental* biological information about plants and non-medical related microorganisms that can provide support for future energy related biotechnologies. The objective is to pursue *basic* biochemical, genetic and physiological investigations that may contribute towards providing alternate fuels, petroleum replacement products, energy conservation measures as well as other technologies such as phytoremediation related to DOE programs. Areas of interest include bioenergetic systems, including photosynthesis; control of plant growth and development, including metabolic, genetic, and hormonal and ambient factor regulation, metabolic diversity, ion uptake, transport and accumulation, stress physiology and adaptation; genetic transmission and expression; plant-microbial interactions, plant cell wall structure and function; lignocellulose degradative mechanisms; mechanisms of fermentations, genetics of neglected microorganisms, energetics and membrane phenomena; thermophile (molecular basis of high temperature tolerance); microbial interactions; and one-carbon metabolism, which is the basis of biotransformations such as methanogenesis. The objective is to discern and understand basic mechanisms and principles.

Funds are expected to be available for new grant awards in FY 1998. The

magnitude of these funds available and the number of awards which can be made will depend on the budget process. The awards made during FY 1996 averaged close to \$100,000 per year, mostly for a three-year duration. The principal purpose in using preapplications at this time is to reduce the expenditure of time and effort of all parties. Information about development and submission of applications, eligibility, limitations, evaluations and selection processes, and other policies and procedures may be found in the 10 CFR Part 605 and the Guide. The Application Guide for the Office of Energy Research Financial Assistance Program for formal submissions and copies of 10 CFR Part 605 are available from U.S. Department of Energy, Office of Basic Energy Sciences, ER-17, Division of Energy Biosciences, 19901 Germantown Road, Germantown, MD 20874-1290. Telephone requests may be made by calling (301) 903-2873. Instructions for preparation of an application are included in the application guide. Electronic access to ER's Financial Assistance Guide is possible via the Internet using the following Web site address: <http://www.er.doe.gov/production/grants/grants.html>.

The Catalog of Federal Domestic Assistance number for this program is 81.049, and the solicitation control number is ERFAP 10 CFR Part 605.

Issued in Washington, D.C., on December 17, 1996.

John R. Clark,
*Associate Director for Resource Management,
Office of Energy Research.*

BILLING CODE 6450-01-P

Federal Energy Regulatory Commission

[FERC-592]

Agency Information Collection Under Review by the Office of Management and Budget

December 24, 1996.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of request submitted for review to the Office of Management and Budget.

SUMMARY: The Federal Energy Regulatory Commission (Commission) has submitted the energy information collection listed in this notice to the Office of Management and Budget (OMB) for review under provisions of the Paperwork Reduction Act of 1995

(Pub. L. 104-13). Any interested person may file comments on the collection of information directly with OMB and should address a copy of those comments to the Commission, as explained below. The Commission did not receive any public comments in response to an earlier Federal Register notice of September 18, 1996 (61 FR 49121-49122).

DATES: Comments must be filed on or before January 29, 1997.

ADDRESSES: Address comments to Office of Management and Budget, Office of Information and Regulatory Affairs, Attention: Federal Energy Commission Desk Officer, 726 Jackson Place N.W., Washington, D.C. 20503. A copy of the comments should also be sent to Federal Energy Regulatory Commission, Division of Information Services, Attention: Mr. Michael Miller, 888 First Street, N.E., Washington, D.C. 20426.

FOR FURTHER INFORMATION CONTACT: Michael Miller may be reached by telephone at (202) 208-1415 and by e-mail at mmiller@ferc.fed.us.

SUPPLEMENTARY INFORMATION:

Description: The energy information collection submitted to OMB for review contains:

1. Collection of Information: FERC-592, "Marketing Affiliates of Interstate Pipelines".
2. Sponsor: Federal Energy Regulatory Commission.
3. Control No.: 1902-0157. The Commission is now requesting that OMB approve a three year extension of these mandatory collection requirements.
4. Necessity of Collection of Information: Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing provisions of the Natural Gas Policy Act and the Natural Gas Act (NGA). The Commission monitors the information maintained by interstate natural gas pipeline for transactions of transportation, sales, and storage activities between the pipelines and their marketing affiliates. The information is used to deter undue discrimination by pipeline companies in favor of their marketing affiliates. The information is also used by non-affiliated shippers or others (such as state commissions) to determine whether they have been harmed by affiliate preference and, in some cases, to prepare evidence for formal proceedings following the filing of a complaint. Additionally, pipelines provide 24-hour electronic access of this information to any interested party.
