DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-32, 709; NAFTA-01224]

Penn Mould Industries, Incorporated, Washington, Pennsylvania; Notice of Negative Determination on Reconsideration

On November 27, 1996, the Department issued an Affirmative Determination Regarding Application for Reconsideration for the workers and former workers of the subject firm. The petitioner, American Flint Glass Workers Union, AFL-CIO, presented evidence that the Department's survey of the subject firm customers was incomplete. This notice was published in the Federal Register on December 13, 1996 (61 FR 65599).

The Department's initial denial of TAA for workers of Penn Mould Industries was because the "contributed importantly" group eligibility requirement of Section 222(3) of the Trade Act of 1974, as amended, was not

met. The investigation revealed that layoffs were attributable to a change in the manufacturing process of glass molds at the Washington, Pennsylvania plant.

The Department's initial denial of NAFTA-TAA for workers of Penn Mould Industries was because criteria (3) and (4) of the group eligibility requirements in paragraph (a)(1) of Section 250 of the Trade Act were not met. The subject firm did not import glass forming molds, or shift production to Mexico or Canada. The investigation revealed that layoffs were attributable to a process change in the manufacturing of glass forming molds.

The petitioner provided data on U.S. imports of glass containers to support their claim that workers producing glass forming molds are adversely affected by increased imports. The Department concurs that there is an aggregate increase in imports of glass containers from Mexico and Canada and other foreign sources. However, in order to determine worker eligibility for TAA or NAFTA-TAA, the Department must examine imports of products like or directly competitive with those articles produced at the Washington production facility. In this case, the products produced at Washington were glass forming molds. Glass containers cannot be considered like or directly competitive with the end products produced and sold at the Washington plant.

The petitioner claims that Penn Mould was a captive producer of glass forming molds for its parent company, Ball-Foster Glass Container, Inc. On July 1, 1996, Penn Mould was sold to Ross Mould, Inc. and the Washington, Pennsylvania facility became a commercial producer of glass forming molds. Consequently, the customer base expanded.

The Department conducted a survey of the major customer of Penn Mould Industries, Inc., formerly Penn Mould. Findings of the survey revealed that from 1994 through September 1996, the customer, accounting for the predominate proportion of sales, did not import glass forming molds from Canada, Mexico or other foreign sources.

The petitioner further alleges that workers of another domestic company producing glass forming molds was certified eligible to apply for NAFTA-TAA. Review of that case showed that the workers were certified based on increased company imports of the product.
