

two weeks in advance, and provided with an information copy of the questionnaire (if one is used), and all other materials describing the survey activity. TVA plans to conduct a variety of voluntary customer surveys of our electricity generation customers and our appropriated program customers. These surveys may include web-site questionnaires, written surveys, telephone surveys, individual face-to-face interviews, focus group meetings, and/or large group studies. They will be designed to gather information from a customer's perspective as prescribed in Executive Order 12862, Setting Customer Service Standards, September 11, 1993. The results will be used as part of an ongoing process to improve TVA's performance.

III. Estimate of Burden

The average burden per response is estimated to range from 2 minutes for a web-site questionnaire to 3 hours for a large group study. TVA estimates 4,000 annual respondents for a total of 1350 hours annually for the proposed generic customer survey clearance.

IV. Request for Comments

Comments are invited on:

(a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of TVA's estimate of the burden of the collection of the information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected, and

(d) Ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of the form. They also will become a matter of public record.
