

(C) Time frame during which project was conducted.

(D) Principal outputs or results of the project.

(E) Longer term outcomes and follow-on impacts of the project.

(F) The PI's best assessment of the impact of this NSF-funded research on the current (1996) state of design and manufacturing technology, including any known commercial implementations.

(G) Any other observations that the PI wishes to make (e.g., regarding the promotion of a significant discovery, creation of a significant research capability, promotion of new knowledge flowing to society).

The narratives, citations, and names of others knowledgeable about the project may be submitted using the Internet or regular mail.

The DMII will organize a panel of experts in the field who are knowledgeable about the types of projects funded, and the nature of innovations that have occurred over the past decades. The expert panel's first assignment will be to conduct a thorough review and assessment of the narratives submitted by the PIs. Once the narratives have been reviewed, a subset of 20 outstanding examples of awards with significant impacts will be chosen, and brief case studies will be prepared by the contractor in order to better understand the process by which the impacts occurred.

Under the final phase of this evaluation, the expert panel will then review the case studies and, based upon findings from both the project narratives and the individual case studies, prepare an overall assessment of the contributions made by these awards. The DMII program staff will then review the findings and assess their implications for future program priorities and actions.

DMII has contracted with Abt Associates Inc. of Cambridge, Massachusetts, to assist it in the survey and reports preparation process.

*Use of Information:* The information collected will be used to assist the Foundation in the evaluation of this program, and in considering various program priorities and selection procedures for future projects in this area. NSF will also consider how best to satisfy the Government Performance and Results Act (GPRA) in reporting outcomes and impacts of programs of this type. Finally, NSF will determine how to improve future evaluation activities applied to subsequent awards made under this program.

*Confidentiality:* Copies of the narratives will be reviewed by a panel

of experts selected by NSF. The subsequent case studies will also be reviewed by this expert panel. Some materials may be disseminated by NSF as a part of the program evaluation process. No sensitive information is being requested in the survey.

*Burden on the Public:* The Foundation estimates that, on average, two hours will be required to prepare the narratives, or a total of 400 hours for all PIs. In addition, it anticipates 4 hours of interviews for each of 20 case studies, or 80 hours. Thus, total burden is estimated at 480 hours.
