

biennially among students attending regular public, private, and Catholic schools in grades 9–12. This request is to extend OMB clearance to conduct a YRBS in 1998 among a nationally representative sample of students in alternative schools, which have been excluded from the national school-based YRBS in the past. Alternative schools, which represent about 5% of U.S. high schools, serve students primarily who

are at risk of not progressing in regular high schools and, as a result, not graduating, as well as students who have already gotten into disciplinary trouble, usually related to drug use or violence. Data on the health risk behaviors of adolescents is the focus of at least 26 national health objectives in *Healthy People 2000: Midcourse Review and 1995 Revisions*. This survey will provide data to help measure these

objectives among alternative school students. No other national source of data exists for this population. The data also will have significant implications for policy and program development in alternative schools. The total estimated cost to respondents is \$39,375 assuming a minimum wage of \$5.25 for the 1997–1998 school year.

| Respondents | Number of respondents | Number of responses/respondent | Avg. burden/response (in hrs.) | Total burden (in hrs.) |
|-----------------------------------|-----------------------|--------------------------------|--------------------------------|------------------------|
| Alternative school students | 10,000 | 1 | 0.75 | 7,500 |
