NUCLEAR REGULATORY COMMISSION

[Docket No. 50-219]

In the Matter of GPU Nuclear Corporation; Oyster Creek Nuclear Generating Station; Receipt of Petition for Director's Decision Under 10 CFR 2.206

Notice is hereby given that by Petition dated April 1, 1997, Berkeley Township Environmental Commission (Petitioner) has passed a resolution opposing transfer of spent nuclear fuel from wet to dry storage during operation of Oyster Creek Nuclear Generating Station (OCNGS). Petitioner requests that the U.S. Nuclear Regulatory Commission (NRC) direct GPU Nuclear (GPU) to shut down the nuclear reactor at OCNGS during the aforementioned fuel transfer.

As the bases for its request, Petitioner asserts that (1) the load transfer path for the 100-ton fuel transfer cask passes over the reactor's containment mechanism and other safety-related equipment; (2) NRC Bulletin 96-02, dated April 11, 1996, states that a dropped cask could damage the isolation condensers and the torus, creating the possibility of an unisolable leak, which in industry jargon describes a situation perilously close to a nuclear meltdown; (3) the operating record of GPU demonstrates it is capable of human error, including dropping heavy loads; (4) Berkeley Township could not be successfully evacuated in the event of a serious nuclear accident at OCNGS; and (5) the safer simpler alternative of turning off the reactor while lifting 100-ton loads over the containment can be easily implemented.

This request is being treated pursuant to 10 CFR 2.206 of the Commission's regulations. The request has been referred to the Director of the Office of Nuclear Reactor Regulation. A copy of the Petition is available for public inspection at the Commission's Public Document Room at 2120 L Street, N.W., Washington, D.C.

Dated at Rockville, Maryland this 20th day of May 1997.
