**Proposed Project**

1. Sun Protection for Children—New—Skin cancer is of increasing public health concern because of its increasing incidence. Ultraviolet radiation is the primary risk factor for skin cancers, and the risk of skin cancer appears to be increased with early life exposures to ultraviolet radiation. However, little information is available

A representative sample of parents of children aged 6 months to 10 years, selected by random digit dialing, will be interviewed over the telephone. The information collected will include demographic information, parental knowledge and attitudes about skin cancer and sun protection, and sun protection for their children. The total annual burden hours are 2,594.
